Content Composer Foundation 22.1 (June 2022)

This document contains information about the 22.1 release of Content Composer.

Read all information in this document before you update your installation.

New Features

This release provides the following new features:

Content Composer

- Content Composer now supports:

    - Microsoft Server 2022
    - Windows 10 21H2
    - Windows 11
    - Word 2021

- Audit logging is now available for specific user actions in Content Composer Studio, Content Composer Web Client, and Odin user actions in Content Composer Studio. For more information, see "About Audit Logging" in the *Content Composer Advanced Design and Setup Guide*.

- Content Composer can now be configured to send log information to Splunk.. For more information, see "About Splunk Logging" in the *Content Composer Advanced Design and Setup Guide*.

Archiving

Content Composer now provides the ability to archive documents to OnBase using the OnBase Document REST API.

For more information, see:

- "About OnBase Document REST API" in the *Content Composer Advanced Design and Setup Guide*

- "Scripts and Conditions > MonaLisa Functions > OnBase Document API" in the *Content Composer Studio Help*

- "OnBase Interfaces" in the *Content Composer Studio Help*

    Note: To work with the newly introduced **OnBase Document API Configuration** objects, the user must possess the right **OnBase Document API Configuration (76)**. For more information, see "Updating Object Rights" in the *Content Composer Update Guide*.

Web Client

Content Composer Web Client now provides the ability to create ad-hoc communications. For more information, see "Creating a Communication" and "Creating a Communication from a Third-Party Application" in the *Content Composer Web Client Help*.

Enhancements

This release provides the following enhancements:

Web Client

The Content Composer Web Client user interface has been enhanced.

Studio

- New global rights have been introduced to configure access to the Studio administration tools. For more information, see "Updating Global Rights" in the *Content Composer Update Guide*.

- The new user right **Open Historic Object Version (47)** has been introduced to control the availability of the function **Open and reactivate an old object version**.

Maintenance

OnBase Keyword Configurations

The Content Composer Studio object **OnBase Keyword Configuration** has been renamed to **OnBase DIP File Configuration**.
