# Content Composer Foundation 23.1 (February 2023)

This document contains information about the 23.1 release of Content Composer.

Read all information in this document before you update your installation.

## New Features

This release provides the following new features:

### Content Composer

- Content Composer now supports:
  - Windows 10 22H2
  - Windows 11 22H2
- A new HTTP API and a JSON API has been implemented to enable calls to 3rd party APIs, such as Alfresco and OnBase.

For more information, see “HTTP API” and “JSON API” in the **Content Composer Studio Help**.

- The update process now requires to select the setup type **Custom**. See the **Content Composer Update Guide** for more information.

### Web Client

- Content Composer Web Client now provides the ability to preview PDF, XPS, Image, and Word documents.

#### Known Limitations

- The font style for hyperlinks is not retained in the preview.
- SmartArt graphics table lists are not retained in the preview.
- The font style is not retained in the preview when a custom word template is used.

For more information, see “Previewing a Document” in the **Content Composer Web Client Help**.

## Enhancements

This release provides the following enhancements:

### Web Client

- To delete a communication in Web Client, users now need the new user right **Web Client Delete Communication (54)**.

See the **Content Composer Update Guide** for instructions on how to assign this right.

## Maintenance

### Web Client

- Resolved an issue where a mandatory date field was not highlighted in red if the default value was not changed.
