Perceptive Content Document Viewer Release 1.1.1 (August 11, 2014)

The Document Viewer allows you to access and view documents from within Perceptive Content using a web browser. This utility is part of the Perceptive Content Toolkit, which allows you to embed advanced content management capabilities into your products.

Document Viewer provides a suit of tools you can use to print, view, rotate, zoom, and resize your documents. You can also use a variety of annotation tools to comment on documents.
