## Perceptive Experience Content Apps 2.4.6 Release (November 2019)

Content Apps 2.4.6 provides updates to the functionality of the Content Apps 2.4.0 release.

### System updates

The following system updates are included in this release of Content Apps 2.4.6

- Resolved an issue with mouse right-click paste functionality not working when capturing documents. (PC-88576)
- Resolved an issue with the custom property date type not retaining the correct default value when set to blank. (PC-88542)

## Perceptive Experience Content Apps 2.4.5 Release (September 2019)

Content Apps 2.4.5 provides updates to the functionality of the Content Apps 2.4.0 release.

### System updates

The following system updates are included in this release of Content Apps 2.4.5

- Resolved an issue, when using SSO (framework-core:SsoClientSession and Integration Server), where the system did not set the user name after logging in. This issue prevented the user from checking in documents that they currently had checked out. (PC-88426)
- The system now displays the name of the user currently logged into Perceptive Experience on the User menu. (PC-88426)

## Perceptive Experience Content Apps 2.4.4 Release (August 2019)

Content Apps 2.4.4 provides updates to the functionality of the Content Apps 2.4.0 release.

### System updates

The following system updates are included in this release of Content Apps 2.4.4

- Resolved an issue where the system would display incorrect control types in search dialogs with multiple constraints. (PC-88395)

## Perceptive Experience Content Apps 2.4.3 Release (June 2019)

Content Apps 2.4.3 provides updates to the functionality of the Content Apps 2.4.0 release.

### System Updates

The following system updates are included in this release of Content Apps 2.4.3.

- Resolved an issue where the system displays an error message when a user who does not have access to the All Documents view logs into Perceptive Experience for the first time. (PC-87344)
- Resolved an issue where the auto-complete control did not distinguish between multiple items with the same display value. (PC-88156)
- Resolved an issue that prevented documents with no associated file types or extensions from rendering in Perceptive Experience. (PC-88038)

## Perceptive Experience Content Apps 2.4.2 Release (November 2018)

Content Apps 2.4.2 provides updates to the functionality of the Content Apps 2.4.0 release.

### System Updates

The following system updates are included in this release of Content Apps 2.4.2.

- Resolved an issue that caused related views to return incorrect results in Content Apps. (PC87552)

## DocumentViewer 7.1.4 Release (November, 2018)

The following features are included in this release of DocumentViewer.

### Updates

This release includes the following updates.

- Resolved an issue that caused related views to return incorrect results in Content Apps. (PC87552)

## Perceptive Experience Content Apps 2.4.1 Release (September 2018)

Content Apps 2.4.1 provides updates to the functionality of the Content Apps 2.4.0 release.

The following package version updates are included in this month's patch.

- Documents 4.2.2
- DocumentViewer 7.1.3
- Forms 5.0.2
- Workflow 2.5.2

## Documents Release 4.2.2 (September 2018)

The following updates are included in this release of the Perceptive Experience Documents App.

### Updates

- Resolved an issue where the user interface did not update correctly when editing a search constraint. (PC86760/TFS77546)

## Forms Release 5.0.2 (September 2018)

The following updates are included in this release of the Perceptive Experience Forms.

### Updates

- Resolved an issue where the system did not properly load the content in the form body when the user selected a new form from the drop-down. (PC86766/TFS77557)

## DocumentViewer Release 7.1.3 (September 2018)

The following updates are included in this release of the Perceptive Experience DocumentViewer.

### Updates

- Resolved an issue that caused the save changes dialog to display twice when the user opened a modified document in workflow. (PC86765/TFS77561)
- Resolved an issue where some Android users could not enter text in a text, text stamp or URL annotation. (PC86764/TFS15080)
- Resolved an issue where the last item in a menu list containing a header was not visible to users on mobile devices. (PC86762/TFS77549)
- Resolved an issue where the task viewer was not displaying correctly after a user opened a document in workflow. (PC87033/TFS77849)

## Workflow Release 2.5.2 (September 2018)

The following updates are included in this release of the Perceptive Experience Workflow App.

### Updates

- Resolved an issue where the system did not prompt the user to save changes when choosing an ad-hoc parallel route. (PC87032/TFS77855)
- Resolved an issue where the system did not behave as expected when a user attempted to open a workflow item that was no longer available in the queue (for example, another user has routed the item forward). (PC87012/TFS77741)
- Resolved issues with automatic routes not displaying correctly on mobile devices. Previously, if a workflow queue had multiple automatic routes, the system would only display one for route forward. Also, automatic routes were not sorting by name and were using a different route name than the name used in desktop. (PC86859/TFS77599)
- Resolved an issue with automatic routes (load balance, conditional parallel, and conditional) not routing correctly on mobile devices. (PC86862/TFS77613)
- Resolved an issue where workflow routing did not work correctly for users with process privilege only on mobile devices. (PC86943/TFS77661)
- Resolved an issue where the system incorrectly displayed a blank window when the user attempted to

open a document marked as complete from the workflow queue. (PC86896/TFS77547)

- Resolved an issue where the user interface did not update correctly when editing a search constraint. (PC86760/TFS77546)

## Perceptive Experience Content Apps 2.4.0 Release (2018)

Content Apps 2.4.0 provides new features, product and platform enhancements, and updates. This document provides an overview of the new functionality available to you.
