## Perceptive Experience Content Apps 3.0.12 Release (June 2021)

Content Apps 3.0.12 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.12.

- Resolved an issue where text annotations were cropped on a rotated page. (PC-90246)
- Resolved an issue where newly created annotations were misplaced on pages with unsaved rotations. (PC-90373)
- Resolved an issue where the placeholder for a new annotation moved unpredictably on a rotated page. (PC-90376)

## Perceptive Experience Content Apps 3.0.11 Release (April 2021)

Content Apps 3.0.11 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.11.

- Resolved an issue with stamp annotations on rotated documents incorrectly moving when viewed at different zoom levels. (PC-90164)
- Adjusted the size of text stamp annotations to closer match Perceptive Content Desktop Client. (PC-90163 and PC-90165)

## Perceptive Experience Content Apps 3.0.10 Release (November 2020)

Content Apps 3.0.10 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.10.

- Resolved an issue where users could not print a document as a PDF using Firefox. (PC-89577)

## Perceptive Experience Content Apps 3.0.9 Release (September 2020)

Content Apps 3.0.9 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.9.

- Resolved an issue where the system fails to parse dates with Spanish locale. (PC-89524)

## Perceptive Experience Content Apps 3.0.8 Release (May 2020)

Content Apps 3.0.8 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.8.

- Resolved an issue where users without a valid ImageNow Forms license would receive an error message when changing the document type of a document. (PC-89155)
- Resolved an issue in Workflow where, after clicking the Content Apps Home button from a workflow item, the system would not set the workflow item back to an idle state or notify the user of unsaved changes. (PC-89158)

## Perceptive Experience Content Apps 3.0.7 Release (April 2020)

Content Apps 3.0.7 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.7.

- Resolved an issue where the application could become unresponsive when a user attempted to disconnect with unsaved changes. (PC-89123)
- In Workflow, the system now displays a prompt verifying the user wants to continue routing a document they currently have checked out. (PC-89098)
- Resolved an issue that allowed cross site scripting when an invalid URL was used. (PC-88805)
- Resolved an issue where text stamp annotations were difficult to read because they rotated along with the document page. (PC-89063)
- Added a new configuration property, `cookieSameSitePolicy`, to the `framework-core` section of the `config.json` file. This property specifies the SameSite cookie policy if pages reside in an iframe. (PC-89136)

## Perceptive Experience Content Apps 3.0.6 Release (March 2020)

Content Apps 3.0.6 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.6.

- Resolved an issue with navigating to a specific document page via a URL parameter. (PC-89062)
- Resolved an issue with the toolbar buttons in Capture not displaying properly when the browser window was resized to its minimum width. (PC-89022)
- Resolved an issue, when using Mobile Capture on iPads, with the browse functionality not working correctly when attempting to selecting files. (PC-89007)

## Perceptive Experience Content Apps 3.0.5 Release (February 2020)

Content Apps 3.0.5 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.5.

- Resolved an issue where deleted annotations would sometimes rendered to the page after switching pages. (PC-89005)
- Resolved an issue with text stamp annotations, created with templates, not displaying the correct year. (PC-89009)
- Resolved an issue with stamp annotations not displaying on documents viewed in workflow. (PC-89048)

## Perceptive Experience Content Apps 3.0.4 Release (December 2019)

Content Apps 3.0.4 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.4.

- Resolved an issue with unnecessary multiple user preference calls (ENTITY\_PREF\_LIST\_GET) to the server at login. (PC-88717)
- Resolved an issue where the system would not save folder or document properties when a custom property date value was blank. (PC-87932)

## Perceptive Experience Content Apps 3.0.3 Release (November 2019)

Content Apps 3.0.3 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.3.

- Resolved an issue searching with custom property date constraints during daylight savings time. (PC-88621)
- Resolved an issue with mouse right-click paste functionality not working when capturing documents. (PC-88576)
- Resolved an issue with the custom property date type not retaining the correct default value when set to blank. (PC-88542)

## Perceptive Experience Content Apps 3.0.2 Release (September 2019)

Content Apps 3.0.2 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.2.

- Resolved an issue, when using SSO (framework-core:SsoClientSession and Integration Server), where the system did not set the user name after logging in. This issue prevented the user from checking in documents that they currently had checked out. (PC-88426)
- The system now displays the name of the user currently logged into Perceptive Experience on the User menu. (PC-88426)

## Perceptive Experience Content Apps 3.0.1 Release (August 2019)

Content Apps 3.0.1 provides updates to the functionality of the Content Apps 3.0.0 release.

### System updates

The following system updates are included in this release of Content Apps 3.0.1.

- Resolved an issue where the system would display incorrect control types in search dialogs with multiple constraints. (PC-88395)

### Module updates

The following module updates are included in this release of Content Apps 3.0.1.

- Documents
- Folders

## Documents Release (August 2019)

The following updates are included in this release of the Perceptive Experience Documents App.

### Updates

- Resolved an issue where a user preference was overriding URL parameters when showing or hiding the list of views. (PC-88349)

## Folders Release (August 2019)

The following updates are included in this release of the Perceptive Experience Folders App.

### Updates

- Resolved an issue where the user received an error when appending a document to another document in the same folder. (PC-88340)

## Perceptive Experience Content Apps 3.0.0 Release (June 2019)

Content Apps 3.0.0 provides updates to the functionality of the Content Apps 3.0.0 release.

The following module updates are included in this release.

- Content Capture
- Folders
- Tasks
- Workflow

### System Enhancements

The following system enhancements are included in this release of Content Apps 3.0.x.

- Upgraded the version of jQuery deployed with eForms to 3.3.1. (PC-87718)
- Improved navigation, including a secondary breadcrumb navigation system that allows you to easily determine your location within the file or folder structure. (PC-56960)
- You can specify the hexadecimal color of the application breadcrumbs in the framework-brand section of the config.json file. (PC-56960)
- Added a shared toolbar component for all document and folder actions. (PC-87292)
- Added the ability for Perceptive Experience to dynamically enable or disable buttons and controls based on the user's privileges. (PC-57210)
- You can now customize the layout of the Action toolbar by configuring the priority, *groupId* and *isVisible* settings in the platform specific, phone or action, section of each item in the config.json configuration file. (PC-87346)

## Content Capture Release (June 2019)

The following updates are included in this release of Perceptive Experience Content Capture App.

### Updates

- You can now capture multiple documents during a single scan session. (PC-56885)
- Added a new image processing filter, auto rotation, which can be used to correct the orientation of scanned or imported images. For more information, see the Image processing filters topic in the Content Capture Online Help.

## Folders Release (June 2019)

The following updates are included in this release of the Perceptive Experience Folders App.

### Updates

- Added a new module, Folders, that allows you to group documents and other folders together.
- You can view related folders and folder properties in the folder viewer. (PC-85995)
- You can view all related tasks in the folder viewer. (PC-56957)
- Folders supports view filters and prompted filters. (PC-87415)

## Tasks Release (June 2019)

The following updates are included in this release of the Perceptive Experience Tasks App.

### Updates

- You can now modify tasks in Perceptive Experience. (PC-57184)

## Workflow Release (June 2019)

This following updates are included in this release of the Perceptive Experience Workflow App.

### Updates

- You can now perform workflow actions for folders, such as add, open or route a folder in workflow. (PC-56869)
