Perceptive Experience Content Apps Technical Specifications

Content Apps in this release provides you with the Content Capture, Documents, Folders, Tasks and Workflow functionality. With these Apps you can view and manage your content with the convenience of a web browser outside of Perceptive Content itself.

The technical specifications in this document are specific to Content Apps version 3.0 and represent the specifications required to run all packages included in this release. Some individual package specifications may vary. For individual package specifications refer to the Content Capture, Documents, Folders, Forms, Tasks, and Workflow sections below.

Desktop Browsers

- Microsoft Internet Explorer 11, Microsoft Edge
- Mozilla Firefox
- Google Chrome
- Apple Safari

Supported browser versions are listed, however, we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Enterprise Software Support if you find browser incompatibility.

Mobile Apps

- Perceptive Experience mobile app for Android (Android 5.0 and higher)
- Perceptive Experience mobile app for iOS (iOS9.0 and higher)

Network Connectivity

Supported products with 3G, 4G, or Wi-Fi connectivity.

Web Application Servers

64-bit Apache Tomcat 7, 8.5, or 9

Note: You must configure use of SSL when using Perceptive Experience with Perceptive Integration Server version 7.1.5 or higher. To configure use of SSL you must do so on your web application server.

Prerequisite Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x
- File Conversion Service 4.3.x
- Perceptive Experience Web Scan (to support web scanning with Content Capture)

Content Capture specifications

Content Capture allows you to capture items and review them before you save them as a document in Perceptive Content for further processing. The technical specifications in this document are specific to Content Capture version 3.0.x.

Desktop Browsers

- Microsoft Internet Explorer 11
- Microsoft Edge
- Mozilla Firefox (Microsoft Windows OS)
- Google Chrome (Microsoft Windows OS)
- Apple Safari (Mac OS v10.10)

Note: File capture is supported on Mac OS, but scanning is not.

Supported browser versions are listed, however we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Enterprise Software Support if you find browser incompatible.

Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x
- Perceptive Web Capture (Optional. To support web scanning)
- A Cloud Certified ISIS driver (Optional. To support web scanning)

Compatibility

We recommend that you install the Perceptive Experience Apps on the same web server as Integration Server to support the known functionality of the identified browsers.

Additional specifications

Refer to the Perceptive Content 7.3.x Technical Specifications for additional information.

Documents specifications

Perceptive Experience allows you to view and manage your structured and unstructured digital content on any device. The technical specifications in this document are specific to Documents version 4.2.x.

Desktop Browsers

- Microsoft Internet Explorer 11
- Microsoft Edge
- Mozilla Firefox (Microsoft Windows OS)
- Google Chrome (Microsoft Windows OS)
- Apple Safari (Mac OS v10.10)

Supported browser versions are listed, however we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Product Support if you find browser incompatibility.

Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x
- File Conversion Service 4.3.x (required to support annotations and print functionality)

Note: To view the file types supported by ISYS doc filters, you need to install File Conversion 3.0.x.

Compatibility

We recommend that you install the Perceptive Experience Apps on the same web server as Integration Server to support the known functionality of the identified browsers.

Additional specifications

Refer to the Perceptive Content 7.3.x Technical Specifications for additional information.

Folders specifications

Perceptive Experience allows you to view and manage your structured and unstructured digital content on any device. The technical specifications in this document are specific to Folders version 2.0.1.

Desktop Browsers

- Microsoft Internet Explorer 11
- Microsoft Edge
- Mozilla Firefox (Microsoft Windows OS)
- Google Chrome (Microsoft Windows OS)
- Apple Safari (Mac OS v10.10)

Supported browser versions are listed, however we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Product Support if you find browser incompatibility.

Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x
- File Conversion Service 4.3.x (required to support annotations and print functionality)

Note: To view the file types supported by ISYS doc filters, you need to install File Conversion 3.0.x.

Compatibility

We recommend that you install the Perceptive Experience Apps on the same web server as Integration Server to support the known functionality of the identified browsers.

Additional specifications

Refer to the Perceptive Content 7.3.x Technical Specifications for additional information.

Tasks specifications

Perceptive Experience allows you to view and manage your structured and unstructured digital content on any device. The technical specifications in this document are specific to Tasks version 2.6.x.

Desktop Browsers

- Microsoft Internet Explorer 11
- Microsoft Edge
- Mozilla Firefox (Microsoft Windows OS)
- Google Chrome (Microsoft Windows OS)
- Apple Safari (Mac OS v10.10)

Supported browser versions are listed, however we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Product Support if you find browser incompatibility.

Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x
- File Conversion Service 4.3.x

Compatibility

We recommend that you install the Perceptive Experience Apps on the same web server as Integration Server to support the known functionality of the identified browsers.

Additional specifications

Refer to the Perceptive Content 7.3.x Technical Specifications for additional information.

Workflow specifications

Perceptive Experience allows you to view and manage your structured and unstructured digital content on any device. The technical specifications in this document are specific to Workflow version 2.5.x.

Desktop Browsers

- Microsoft Internet Explorer 11
- Microsoft Edge
- Mozilla Firefox (Microsoft Windows OS)
- Google Chrome (Microsoft Windows OS)
- Apple Safari (Mac OS v10.10)

Supported browser versions are listed, however we recommend that you upgrade to the latest patch of the supported browsers. Note that some browsers release automatic updates and some browsers no longer support version numbers.

Browser versions that update automatically after you install Perceptive Experience are also assumed to work unless otherwise noted. Contact Product Support if you find browser incompatibility.

Software

- Perceptive Content Client 7.3.x
- Perceptive Content Server 7.3.x
- Integration Server 7.3.x

Compatibility

We recommend that you install the Perceptive Experience Apps on the same web server as Integration Server to support the known functionality of the identified browsers.

Additional specifications

Refer to the following Perceptive Content 7.3.x Technical Specifications for additional information.
