Perceptive Experience Content Apps Foundation 22.1 (3.5.6) Release (October 2022)

Content Apps Foundation 22.1 (3.5.6) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.6).

- Added a new configuration property, `show-search-controls`, to the `lesrdl-content-views` section of the `config.json` file. This property specifies whether to display or hide the filter controls in the Views grid. (PER-7338)

Perceptive Experience Content Apps Foundation 22.1 (3.5.5) Release (September 2022)

Content Apps Foundation 22.1 (3.5.5) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.5).

- Resolved an issue with the system not consistently reload a document when loading a batch. (PER-7272)
- Resolved an issue with the system not displaying the rotation of an image in a thumbnail if that image was previously viewed. (PER-7279)

Perceptive Experience Content Apps Foundation 22.1 (3.5.4) Release (July 2022)

Content Apps Foundation 22.1 (3.5.4) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.4).

- Resolved an issue where the system would not display view results until the user scrolled the grid. (PER-7185)

Perceptive Experience Content Apps Foundation 22.1 (3.5.3) Release (June 2022)

Content Apps Foundation 22.1 (3.5.3) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.3).

- Resolved an issue with OIDC authentication flow when configuring the clientSession setting to les-rdk-fpa-mobile-context:IdpClientSession in Hyland Mobile 1.5 and later. (PER-7185)
- When adding a page to a document using a scanner source profile, the DPI default is now set to 300 if this value was not set in the profile. (PER-7139)

Perceptive Experience Content Apps Foundation 22.1 (3.5.2) Release (May 2022)

Content Apps Foundation 22.1 (3.5.2) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.2).

- Resolved an issue with the selected row on a grid not maintaining the selection after a user opens an item and then returns to the grid. (PER-7073)
- Removed the ability to add an annotation on right-click for stamp annotations. (PER-7055)

Perceptive Experience Content Apps Foundation 22.1 (3.5.1) Release (April 2022)

Content Apps Foundation 22.1 (3.5.1) provides updates to the functionality of the Content Apps Foundation 22.1 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.5.1).

- Resolved an issue in Experience Mobile with forms not loading on an initial attempt. (PER-4701)
- Resolved an issue where the lesrdl-content-integration server OidcClientSession property did not correctly match the callback URL. (PER-7048)
- Resolved an issue on Android devices where sending an email could cause the Hyland Mobile application to unexpectedly close. (PER-4690)

- Resolved an issue where session pings were sent before authentication with the server. (PER-4703)
- Resolved an issue where capturing a document using an application plan with a DATE custom property set to Default to the current date could cause the system to display a future date and day. (PER-6990)
- A new setting, originDrawerMapping, was added to the lesrdl-content-capture-indexing section of the config.json configuration file. For more information, see the Capture and Indexing Installation Guide. (PER-7067)

Perceptive Experience Content Apps Foundation 22.1 Release (February 2022)

The following enhancements and updates are included in the initial release of Content Apps Foundation 22.1.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1.

- Resolved an issue with user lists taking an extended amount of time to populate. (PER-567)
- Resolved an issue where the system would not update date custom properties when changing the value using the calendar control. (PER-6948)
- Resolved an issue where the system would fail to re-authenticate the user after a session timeout. (PER-4702)
- You can now print the contents of a Sticky Note annotation. (PC-90474)
- Resolved an issue where Experience Capture would incorrectly require the user to enter a value for date custom property fields that allowed a blank value. (PC-90808)
- Resolved an issue on Android devices where following a deep link would require users to log into Hyland Mobile every time. (PC-90495)
- Resolved an issue with Perceptive Content forms not loading properly in Hyland Mobile Shell 1.5. (PC-90807)
- Resolved an issue where the ?noheader query parameter was lost during OIDC login. (PC-90545)
- Resolved an issue where the system would incorrectly duplicate the Document Viewer each time a user would click or copy and paste a link with the anonymous URL request parameter. (PC-90505)
- Resolved an issue with the Document Viewer not displaying the appropriate document after selecting a new document while the viewer is still loading. (PC-90608)
- Resolved an issue with the system incorrectly locking a workflow item after refreshing your browser window with unsaved changes. (PC-90609)
- Removed the all-user-cache-enabled property in the lesrdl-content-search-controls section of the config.json file. Updated user lists to an incremental search control. The new configuration property, user-list-limit, in the general-settings section specifies the maximum number of matches returned.

(PER-669)

- Added a new configuration property, `max-file-size`, to the `lesrdl-framework-capturesource-file` section of the `config.json` file. This property specifies the maximum file size, in MB, that you can upload when capturing a document. (PC-90751)
- Added a new configuration property, `vsl-any-key-condition-enabled`, to the `lesrdl-content-search-controls` section of the `config.json` file. This property specifies whether Perceptive Content Apps includes the Any Document Key condition in the list of results. (PC-90739)
- Added a new configuration property, `all-user-cache-enabled`, to the `lesrdl-content-search-controls` section of the `config.json` file. This property specifies whether the All Users group is loaded into the search controls cache. (PC-90766)
