Overview 4

Capture and Indexing 24.1 (March 2024)..... 4

Overview

The Capture and Indexing application allows you to capture and index documents into Perceptive Content. Documents are organized into batches which flow through a workflow process composed of different indexing and validation queues designed based on customer requirements. The custom designed workflow process allows for different roles within your organization to handle different tasks during the life of a batch.

Capture and Indexing 24.1 (March 2024)

The following enhancements and updates are included in the initial release of Capture and Indexing 24.1.

Updates

- Resolved an issue where documents were not deleted after deleting the last page. (PER-8218)
- Resolved an issue where the Send To list was not displaying the list of available queues in the correct order. (PER-8196)
- Resolve an issue in Capture and Indexing where the Settings icon on the Add Pages dialog box was incorrectly disabled when adding pages to an existing document. (PER-8885)
- Added a new value, `disabledAllowLookups`, to the property configuration for each workflow queue. For more information, see the `workQueue` section of Appendix A; `config.json` properties in the Capture and Indexing Installation Guide. (PER-9290)
