Perceptive Experience Content Apps Foundation 22.2 (3.6.1) Release (February 2023)

Content Apps Foundation 22.2 (3.6.1) provides updates to the functionality of the Content Apps Foundation 22.2 release.

System updates

The following system updates are included in this release of Content Apps Foundation 22.1 (3.6.1).

- Resolved an issue where the system would not save recently used stamp annotations if the annotation position was dragged while clicking. (PER-7367)

Perceptive Experience Content Apps Foundation 22.2 Release (November 2022)

The following enhancements and updates are included in the initial release of Content Apps Foundation 22.2.

System updates

The following system updates are included in this release of Content Apps Foundation 22.2.

- Added a new configuration property, show-search-controls, to the lesrdl-content-views section of the config.json file. This property specifies whether to display or hide the filter controls in the Views grid. (PER-7338)

- Resolved an issue with OIDC authentication flow when configuring the clientSession setting to les-rdk-fpa-mobile-context:ldpClientSession in Hyland Mobile 1.5 and later. (PER-7185)

- Resolved an issue in Experience Mobile with forms not loading on an initial attempt. (PER-4701)

- Resolved an issue where the lesrdl-content-integration server OidcClientSession property did not correctly match the callback URL. (PER-7048)

- Resolved an issue where capturing a document using an application plan with a DATE custom property set to Default to the current date could cause the system to display a future date and day. (PER-6990)

- Resolved an issue on Android devices where sending an email could cause the Hyland Mobile application to unexpectedly close. (PER-4690)

- Resolved an issue where session pings were sent before authentication with the server. (PER-4703)

- Resolved an issue where the default file extensions in import INI settings failed to import the files in a case-sensitive operating system. (PER-5377)

- Integration Server, Forms Server and PEDS now support Tomcat version 10. (PER-6954)

- Integration Server, Forms Server, PCR, Email Agent and PEDS now support Java 17 Runtime Environment. (PER-6987)

- Resolved an issue where users were unable to drag and drop more than 19 pages from one document to another. (PER-4640)

- Removed the ability to add an annotation on right-click for stamp annotations. (PER-7055)

- Resolved an issue with the selected row on a grid not maintaining the selection after a user opens an item and then returns to the grid. (PER-7073)

- Resolved an issue with the system not consistently reload a document when loading a batch. (PER-7272)

- Resolved an issue with the system not displaying the rotation of an image in a thumbnail if that image was previously viewed. (PER-7279)
