Overview	4
Migrate the Perceptive Content Shared Directory	4

Overview

Starting with Perceptive Content EP4 the Windows installers solely use **environment.ini** for the **Perceptive Content Shared Directory** location (**IMAGENOWDIR6**). This document provides steps to migrate this directory to a new location.

Migrate the Perceptive Content Shared Directory

To perform a migration of the **Perceptive Content Shared Directory** perform the following steps:

1. On all servers running **Perceptive Content Products** perform the following substeps.
 1. Stop all **Perceptive Content Agents**.
 2. Disable all scheduled tasks that use **Perceptive Content Products**.
2. Backup the existing **Perceptive Content Shared Directory**.
3. Copy shared directory data to the new location.
4. On all servers ensure the new shared directory location is accessible.
 1. Ensure Perceptive Content service accounts have read/write access to new location.
 2. Update **environment.ini** to reference the new location. Set **IMAGENOWDIR6** to the location of the new **Perceptive Content Shared Directory**.
 3. Ensure the old location is no longer referenced in the **environment.ini** files.
5. Disconnect the location of the old shared directory.
6. On all servers perform the following substeps.
 1. Start all **Perceptive Content Agents**.
 2. Enable all previously disabled scheduled tasks that use **Perceptive Content Products**.
 3. Verify all agents are running and using the updated **Perceptive Content Shared Directory** location.
