What is Gear View QC?

Gear View QC is a PACS QC program for correcting common mistakes in DICOM image data. It provides functionality for viewing, importing, editing, printing, and sending DICOM studies to PACS/EHR. Gear View QC includes the following functions.

- Editing patient demographics and study details
- Reassigning studies and series
- Editing DICOM fields at the image, series, study, and patient levels

Gear View QC is intended for use by PACS administrators, physicians, and clinical staff. Users must understand the DICOM image format, as well as the clinical application of the images they modify. The following lists the minimum system requirements for Gear View QC.
