About Perceptive Connector for Microsoft Dynamics AX

Perceptive Connector for Microsoft Dynamics AX is a SOAP-based web service that you can integrate with your application to fetch data from Microsoft Dynamics AX and create an invoice.

For example, if you integrate Perceptive Connector for Microsoft Dynamics AX with an eform, it acts as a medium layer that fetches data from Microsoft Dynamics AX to populate fields in the eform. Based on the populated fields, you may create an invoice in Microsoft Dynamics AX.

Technical specifications
