## General Notes

This document describes defect corrections, software enhancements and installation instructions for hot patch build 5628 for Perceptive Intelligent Capture 5.6 SP1..

## Enhancements

Perceptive Intelligent Capture 5.6 SP1 now supports Internet Explorer 11 as client browser.

## Updates

In the following table, ID # denotes the Software Problem Report identifier Perceptive Software uses internally to track defects, and Case # denotes the Support case number Perceptive Software Customer Support uses to track customer-reported issues.

ID#	Case #	Affected Feature / Engine	Description
TFS11481	N/A	Web Verifier Batch release	Resolved an issue in Web Verifier that could cause a batch to incorrectly release to state 700. This could occur if the user, after verification of the last document in a batch, clicked <b>No</b> in the <b>Would you like to release the batch</b> dialog box, and then returned to the batch list.
TFS11344	N/A	Web Verifier Languages	Resolved an issue where Web Verifier users could not enter Polish-specific characters for the User Name and Password on the login screen.

## Installation notes

You must install this hot patch on all servers with Web Verifier installations.

To install this hot patch, complete the following steps.

1. Stop or exit **IIS**.
2. Extract the files from the hot patch package.
3. Back up the contents of the following directories, then replace the DLL and PDB files with the hot patch contents.
  - *[installation directory]*\Perceptive Intelligent Capture\bin
  - *[installation directory]*\Perceptive Intelligent Capture Web Server\Bin
4. In the *[installation directory]*\Perceptive Intelligent Capture Web Server folder, back up **Login.aspx**. Then, replace **Login.aspx** with the hot patch content.
5. To load the new **Login.aspx** file, clear the browser cache.
6. Restart the **IIS** services.

## Restore to the previous version

To restore the previous state, complete the following steps.

1. Stop or exit **IIS**.
2. Restore your back up files to the following directories.
  - *[installation directory]*\Perceptive Intelligent Capture\bin
  - *[installation directory]*\Perceptive Intelligent Capture Web Server
  - *[installation directory]*\Perceptive Intelligent Capture Web Server\Bin
3. Restart the **IIS** services.
