Perceptive Intelligent Capture Connector Release (October 10, 2014)

Perceptive Intelligent Capture Connector (PIC Connector), version 1.0.1, allows you to create, configure, and enable channels that map data and functionality between ImageNow and Perceptive Intelligent Capture (PIC).

With a combination of channels, you can create a solution that outputs Perceptive Content files to PIC, routes documents according to their status code while processing, and imports the extracted XML data into Perceptive Content eForm fields, document properties, or other objects.

The PIC Connector uses the Perceptive Connect Runtime. For more information, refer to the *Perceptive Connect Runtime Installation and Setup Guide 1.0.x* or contact your Perceptive Software representative.
