Table of Contents

Solution Configuration Manager Release 2.0 (October, 2020)

This document contains important information about the 2.0 release of the Solution Configuration Manager (SCM). It contains descriptions of the new features, enhancements, and bug fixes.

New Features

SCM 2.0 Product Enhancement List

Feature	Description
Table Locking Notifications	SCM 2.0 has been enhanced to display notification texts when tables are locked for editing, during the following user actions: • Pop-up notification during login and logout. • Notification text on screens when viewing a table which is currently locked.
Security Enhancements	• Enhanced the SCM Installer to support TLS 1.2. • Included the latest OLE DB provider for SQL Server supporting TLS 1.2. • Added the ability to restrict sensitive information in packets from being migrated to other environments. • Masked the Password fields. • Upgraded to JQuery 3.5.
Configuration Packets	• Enhanced packet functionality that enables exporting and importing of configuration changes from previous versions into different solution environments. • Added the ability to import a configuration packet created in a previous version of SCM to SCM 2.0.
User Interface Enhancements	• Language selector is visible only if the language is not set to English. • The **Manage Projects** menu in the UI has

Feature	Description
	been enhanced to improve navigation. • Help text is now displayed below the configuration option frames as each option is selected. • Help text is also available when clicking the **Help** link as in previous versions.
Additional Enhancements	• Error messages and trace log detail has been enhanced for more clarity.

Fixed Defects

SCM 1.3.1 to SCM 2.0 - Defect Correction List

Defect ID	Description
SOL2-898	When filtering for packets Oracle- Packet Export enforces case sensitivity for login.
TFS# 23309	When attempting to upload a package with the same 'Package Type' within SCM the error message should be more user friendly.
TFS# 32267	Attempting to delete a project using Oracle throws an exception and the delete action fails.
TFS# 32855	Log injection possible as an unauthenticated user. Remove Language Drop-down on Login Screen.

Solution Configuration Manager Release 1.3.1 (October, 2019)

This document contains important information about the 1.3.1 release of the Solution Configuration Manager (SCM). It contains descriptions of the bug fixes done for this release.

Fixed Defects

BIC Solution Configuration Manager 1.3 to 1.3.1 - Defect Correction List

Defect ID	Description
Bug 29370	Password policy message persists to appear on pages that are not relevant.
Bug 28844	Inability to log on to SCM after configuring Windows authorization.

Solution Configuration Manager Release 1.3. (July, 2019)

This document contains important information about the 1.3 release of the Solution Configuration Manager (SCM). It contains descriptions of the new features, enhancements, and bug fixes.

New Features

SCM 1.3 Product Enhancement List

Feature	Description
.NET version	The .NET version in SCM 1.3 is upgraded to .NET Framework 4.6 to be in sync with the Brainware Intelligent Capture 5.9.1 platform. The SCM Installer is also upgraded to check for the .NET 4.6 prerequisites, before installation.
Security Enhancements	- Enhanced encryption. - General security improvements. - Enforcement of password complexity has been addressed. - The 'Remember Me' function while logging on is removed for increased security.
SCM Installer	Introduced the following warning for SCM Installations: Warning - The SCM Installer is currently only usable for NEW INSTALLATIONS. If you need to do an uninstall or upgrade, please refer to the Installation Guide for steps to follow. Use of this installer application for purposes

Feature	Description
	other than an NEW Installation could cause harm to the existing implementation.
	• The installer can no longer be used to uninstall a previous version of the application. A warning message, that an existing version must be removed manually by following the instructions in the Installation Guide, is displayed.
	• The installer can no longer be used to overwrite an existing database. If the SCM Configuration database exists, the user will either need to change the database name or manually remove the existing database table before continuing.
	• When installing the SCM, if the connection string for the Brainware Intelligent Capture database is encrypted, the user will be required to enter the connection string manually.
	• In this release, the ability to install or deploy SCM package(s) for Solutions (BFI, BFT) as an automated step of the SCM Installer has been removed. Solution SCM Packages will only be available on the Downloads page specific to the Solution version involved. Once SCM is installed, Solution SCM Packages can be deployed using the existing capability within SCM. This helps in removing any dependencies or requirements to deploy solution packages as a part of the SCM installation process.
Database Support	Oracle Client 12c is required if using an Oracle11g database.
BIC Core Compatibility	SCM is compatible with BIC 5.9.1 with its new password hashing feature and is also compatible with earlier BIC versions.

Fixed Defects

BIC Solution Configuration Manager 1.2 to 1.3 - Defect Correction List

Defect ID	Description
Bug 25931	While using Windows Authentication to log in, Login is displayed instead of Logout in the SCM title bar.
Bug 25930	Failure to display Window Authentication user in SCM after login.
Bug 25474	The **Project Name** field does not have a character limit of 50.
Bug 25386	The **Export Option** page freezes and on trying to save, it throws an exception error.
Bug 24868	The Profile Settings drop-down list continues showing old selected data, even after a different project is selected from the project drop-down list.
Bug 24809	Display text for the BFI project is incorrect when both BFI and BFT packages are configured in SCM.
Bug 24791	Inability to edit or delete entries into the Database Connection Settings list.
Bug 24790	Inability to delete or reset existing packages from SCM.
Bug 24752	SCM Installer: Unexpectedly closes when using database credentials with insufficient privileges.
Bug 24680	SCM installation fails with an "Unhandled Exception" when an invalid connection string is used.
Bug 24675	The SCM Web Application fails to launch and throws an error after SCM is installed.
Bug 24379	SCM Installer: Fails to run if the Database Scripts folder does not exist.

Solution Configuration Manager Release 1.2.(October, 2018)

This document contains important information about the 1.2 release of the Solution Configuration Manager (SCM). It contains descriptions of the new features, enhancements, and bug fixes.

New Features

There are no new features in the SCM 1.2 release.

Fixed Defects

BIC Solution Configuration Manager 1.1 to 1.2 – Defect Correction List

Defect ID	Description
Bug 22905	Fixed the defect where the SCM installer throws a login error in some Oracle environments with an invalid table name error message.
Bug 23294	Fixed the defect where the SCM installer renders a BIC Oracle Connection String invalid.
