## Overview

Mobile Experience enables you to access apps such as Capture, Documents, and Tasks and allows you to configure user settings for the same. You can add and edit the URL details of the server you want to connect to, download new apps, view application log details, and log in using offline mode. You can also create and edit a four-digit PIN to enable offline login.

## Mobile Experience 6.2.x Release [October, 2018]

This release includes the following versions.

- Mobile Experience 6.2.2 for iOS

### Updates

This release provides the following updates.

- Resolved an issue in iOS 12 where the **Save** and **Close** buttons were disabled if an image was edited in the image editor. (TFS77958)
- Resolved an issue in iOS 12 where a user was unable to add an image to the custom gallery if the image was captured in document mode. (TFS77959)

## Mobile Experience 6.2.x Release [April, 2018]

This release includes the following versions.

- Mobile Experience 6.2.1 for iOS
- Mobile Experience 6.2.0 for Android

### Enhancements

This release provides the following product enhancements.

- Added the ability to provide a tablet-specific layout for both iOS and Android. (F5363)
- Added the ability to import images from iCloud or Google Photos and add them to an image set. (US40061, US40062)
- Added the ability to import a list of web connection profiles from the device camera or gallery as a QR code for Android and iOS. (US39789, US39791, US39788, US39785)
- Added the ability to export a list of web connection profiles as a QR code to the device storage or through an email for Android and iOS. (US39792, US39793)

## Mobile Experience 6.1.x Release [December, 2017]

This release includes the following version.

- Mobile Experience 6.1.0

## Enhancement

This release provides the following product enhancement.

- Mobile Experience now supports iPhone X.

## Updates

This release provides the following updates.

- Resolved an issue in iOS where a user was not logged out after selecting the backURL from the image set screen. (DE75766)
- Resolved an issue in iOS where a panoramic photo was distorted when a user edited or swiped through the images in an image set. (DE73739)
- Resolved an issue in iOS where an image was saved as a white thumbnail when a user captured a photo with narrow capture area in document mode. (DE74364)
- Resolved an issue in Android where a user was not logged out after selecting the backURL from the image set screen. (DE75766)
- Resolved an issue in Android where the app crashed when a large capture area was used to capture an image in document mode. (DE73137)

## Mobile Experience 6.0.x Release [October, 2017]

This release includes the following versions.

- Mobile Experience 6.0.6 for iOS
- Mobile Experience 6.0.5 for Android

## Enhancements

This release provides the following product enhancements.

- Added the ability to log in to the application using fingerprint authentication on iOS and Android devices. (F12636)
- Improved the application's ability to integrate query parameters within the URL by enabling it to retain an existing session for a user using the 'keepsession' parameter. (F12868)
- Replaced Lexmark Imaging Library with the application's image library for both iOS and Android. **Note:** The new image library supports Core 2 packages only. (F13140)
- Added the ability for the user to receive a detailed email report on app package incompatibility with Perceptive Experience iOS and Android shells. (F5820)
- Added the ability for the administrator to configure additional capture source modules within the application on user request. (F5216)
- Added the ability for the user to view images and videos in landscape mode for Core 2 packages. (F13215).

## Update

This release provides the following update.

- Resolved an issue in iOS where the user launched the app through a URL after installation but landed on the intended screen only after being redirected through the EULA acceptance and the login screens. (DE73059 and DE73169)

## Mobile Experience 5.3.x Release [April, 2017]

This release includes the following version.

- Mobile Experience 5.3.3

## Updates

This release provides the following updates.

- Resolved an issue in iOS where the application crashed when a user changed the onscreen keyboard controls on the document properties screen. (TFS72343)
- Resolved an issue where the user was not able to upload an image set in iOS 10.3 devices. (TFS72378)

## Mobile Experience 5.3.x Release [January, 2017]

This release includes the following version.

- Mobile Experience 5.3.1

## Enhancements

This release provides the following product enhancement.

- You can now follow guided instructions on how to set up a web connection profile when you open Perceptive Experience without creating a web connection profile. (US102119, US102118)
- Added the ability to use Mobile Experience on iPhone 7 and also with iOS 10. (US102099, US102097, US102098, US102096, US102095)
- You can now grant permissions to the app to use the device's camera, microphone, storage, or GPS coordinates after initial privilege denial during app installation or update in Android devices. (US100839, US100836, US100838, US100837)
- Added the ability for the user to capture images and videos in landscape mode. (US104405)

**Note:** The 'mobile-context' package of the app with version 6.0.2 and higher is eligible for landscape support.

## Updates

This release provides the following updates.

- Resolved an issue where the app bundles and packages could be downloaded only when the user put a forward slash at the end of the web server URL. (DE54910)
- Resolved an issue where the total number of images captured exceeded the internal limit of 99 only when the user quick-tapped the camera button. (DE16576)

**Note:** Mobile Experience packages now support framework-core version 2.0 and framework-controls version 3.0.

## Mobile Experience 5.2.x Release [December, 2016]

This release includes the following version.

- Mobile Experience 5.2.6

### Updates

This release provides the following updates.

- Resolved an issue where the user was redirected to the Perceptive Experience login screen when trying to import images from the mobile device gallery in the Documents module. (TFS 23524)
- Resolved an issue which caused the application to crash if backURL parameter was invalid. (TFS 23381)

## Mobile Experience 5.2.x Release [October, 2016]

This release includes the following version.

- Mobile Experience 5.2

### Enhancements

This release provides the following product enhancements.

- Added the ability for the user to create a web connection profile while logging in for the first time if no connection profiles currently exist. (US96308)
- Added the ability to view the progress of URL building on the app screen. (US95696, US95697, US95698, US95699)
- Added a URL parameter to leverage the web connection URL. (US96269, US96270, US96271, US96273, US96274)

### Updates

This release provides the following updates.

- Updated the EULA acceptance method for the user while logging in for the first time. (US96306, US96307)
- Updated the image processing functionality in the document capture mode to provide a more stable and enhanced experience. (US96301, US96302, US96303, US96304, US96305)

## Mobile Experience 5.1.x Release [June, 2016]

This release includes the following version.

- Mobile Experience 5.1

### Enhancement

This release provides the following product enhancement.

- Added the ability to view the EULA before logging in for the first time.

## Mobile Experience 5.0.x Release [April, 2016]

This release includes the following version.

- Mobile Experience 5.0

### Enhancements

This release provides the following product enhancements.

- Added the ability to capture images and videos in the Private Gallery, edit, and add them to an image set. (US90553, US90554, US90108, US90552, US89801, US92993)
- Added the ability to rename existing image sets. (US90378)
- Added the ability to capture documents using the camera in document mode. This mode identifies document borders, modifies skewed borders and enables the user to capture the cropped area of the document. (US90556, US90557, US90559, US90560, US90561, US90562, US93958, US90563, US90564, US90566, US90567)
- Added the ability to use the zoom functionality while capturing images and videos. (US89168, US89169, US89170, US89171, US89172, US89173)
- Added the ability to upload and delete an image set in the Capture screen. (US90245, US90240, US90241, US90239)
- Added the ability to retain camera setting changes after the user logs out from the app. (US90261, US90263, US90258)
- Added the ability to install the perceptive.settings file in the shell from a webserver in Android devices. (US87223, US87224)
- Added the ability to create web connection profiles to configure the location of the web server and download updates in the app. (US91233, US90023, US90024, US90025, US90026)

## Mobile Experience 4.0.x Release [January, 2016]

This release includes the following version.

- Mobile Experience 4.0

## Enhancements

This release provides the following product enhancements.

- Added the ability to create image sets using videos captured and stored in the device. (US82453, US83437, US83236, US77302, US77303, US77304, US77293, US81742, US81743, US78894, US78895, US77301, US78892, US77299, US77300, US78893, US77288, US77289, US75549, US75550)
- Added the ability to authenticate a user by accepting and passing an encrypted token to Integration Server. (US83436, US80859, US81974, US80854)
- Added the ability to use the flash functionality of the camera while capturing an image. (US86085, US86086)
- Added the ability to use the bar code functionality for Android. (US81739, US75035)
- Added support for a URL parameter in Capture app to initially expand or collapse document properties. (US86161, US86162)
- Added the EULA text for user acceptance before logging in for the first time. (US86690, US86689)
- Added the ability to select upload mode of an image set in iOS. (US77258, US78431, US81983, US77257, US76779, US60450, US83554, US76137, US77259, US87489)

## Updates

This release provides the following update.

- Resolved an issue which caused the user to view multiple unstable screens before the intended screen while launching the app through a URL. (US86682, US86688, US86680, US86681)

## Mobile Experience 3.2.x Release [November, 2015]

This release includes the following version.

- Mobile Experience 3.2

## Updates

This release provides the following update.

- Resolved issue which caused the app to crash when using the keypad for certain fields in iPad. (TFS 15295)
