## About Saperion technical specifications

The technical specifications in this document are specific to Saperion version 7.5 SP5.

### End of Life Dates

Saperion Versions	Date
Version 7.5	Planned: Q3 2017
Version 7.1	June 2014
Version 6	April 2013

### Obligations concerning upgrades

We recommend that you update from a 32-bit Saperion version to a 64-bit Saperion version. You should plan this as a project with the help of our service.

### Recommendations concerning upgrades

Plan updates to Version 7.5 from versions earlier than Version 7 as a project, due to the many user interface changes. For further information, refer to the corresponding update guidelines.

### Compatibility Mode

When you update to Saperion version 7.5 and higher from a pre-7.5 version, you must update the clients as well as the servers.

### Discontinued Components and Platforms

Product/Component	Comment
Virtual printer drivers BlackIce (Tiff) Amyuni (PDF)	Replaced by PDF Tools (version 7.5)
Saperion Render plugin	Replaced by render.exe (version 7.5)
Saperion ECM Lotus Notes Rendering (Coextant Render Engine)	Replaced by Swing Framework (version 7.5)
Microfiche	Microfiche display of tray contents. Function of Rich Client (version 7.5)
ELM 5.5	E-Mail Lifecycle Management; use ELM 6.3 or higher
Abbyy FineReader 9	Barcode/ OCR Software

Sap Web Viewer	ZUL-based Viewer (sapviewer.zul and sapviewermail.zul) (version 7.5 SP3)
----------------	--

## Planned Discontinuations

Product/ Component	Comment
Java Core Server (32-bit)	Beginning with Saperion version 7.5 SP6, the 32-bit Java Core Server will no longer be supported for new installations.  The 32-bit Java Core Server will be discontinued with Saperion version 8.0.

## Saperion

Specification	Description						
Operating Systems	<table><tr><th>Operating System</th><th>Version</th></tr><tr><td>Windows Server</td><td>2008 R2 SP1 (Build 7601) for Intel 64/AMD64 (not IA-64)  Saperion offers a 32-bit*2 and a 64-bit*1 based version  Windows Server 2012 Standard Edition (64-bit) (Build 6.2.9200)  Windows Server 2012 R2</td></tr><tr><td>Windows (Client use)</td><td>Windows 7 and 7 SP1, 32-bit, 64-bit in 32-bit mode  Windows 8.1. No support for RT.  Windows 10</td></tr></table>	Operating System	Version	Windows Server	2008 R2 SP1 (Build 7601) for Intel 64/AMD64 (not IA-64)  Saperion offers a 32-bit*2 and a 64-bit*1 based version  Windows Server 2012 Standard Edition (64-bit) (Build 6.2.9200)  Windows Server 2012 R2	Windows (Client use)	Windows 7 and 7 SP1, 32-bit, 64-bit in 32-bit mode  Windows 8.1. No support for RT.  Windows 10
	Operating System	Version					
	Windows Server	2008 R2 SP1 (Build 7601) for Intel 64/AMD64 (not IA-64)  Saperion offers a 32-bit*2 and a 64-bit*1 based version  Windows Server 2012 Standard Edition (64-bit) (Build 6.2.9200)  Windows Server 2012 R2					
	Windows (Client use)	Windows 7 and 7 SP1, 32-bit, 64-bit in 32-bit mode  Windows 8.1. No support for RT.  Windows 10					
	<b>Notes:</b> Saperion offers a 32-bit*2 and a 64-bit*1 based version						
<p>*1     64-bit based operating systems are natively supported with the following restrictions:</p> <ul style="list-style-type: none"><li>•     Server maintenance via 32-bit MMC</li><li>•     No support for the Render plugin</li><li>•     No black-marking on scanned pages in Web Client</li><li>•     No time-stamping</li></ul>							
<p>*2     If you need such features, use the Saperion 32-bit-based version in 32-bit mode on 64-bit based Windows Server, with the following restrictions:</p> <ul style="list-style-type: none"><li>•     SCSI devices are not supported. However, accessing them through 3rd-party software together with our NAS plug-in is supported.</li><li>•     The MMC has to be installed as a 32-bit version (available from Microsoft) to configure the Saperion servers.</li><li>•     The ODBC driver has to be installed as a 32-bit version.</li></ul>							

<p><b>Virtualization Software</b></p>	<p>Lexmark Enterprise Software Deutschland GmbH confirms that we will support customers running Saperion software on supported Operating Systems in a VMware virtual machine environment.</p> <p>Lexmark Enterprise Software Deutschland GmbH will provide unqualified support for Lexmark Enterprise Software Deutschland GmbH software product running in a VMware virtual environment in an identical manner as with Saperion software products running on any other major x86 based systems without initially requiring reproduction of issues on native hardware.</p> <p>Should Lexmark Enterprise Software Deutschland GmbH suspect that the virtualization layer is the root cause of an incident; the customer will be required to contact the appropriate VMware support provider to resolve the VMware issue.</p> <p>While Lexmark Enterprise Software Deutschland GmbH products are expected to function properly in a VMware virtual environment, there may be performance implications which can invalidate Saperion software typical sizing and recommendations.</p> <p>The Saperion Client use on Windows Terminal Server is supported. With Citrix XenDesktop Lexmark Enterprise Software Deutschland GmbH products are likewise expected to function properly.</p> <p><b>Note:</b> Application virtualization is not supported. Desktop virtualization is supported.</p> <p>Feel free to inquire about the availability of support for other operating systems.</p>
---	--

## Databases

For version 7.5 of Saperion ECM, the following databases are certified to work.

Specification	Description	
DBMS	Feel free to inquire about the availability of support for other databases.	
	</	

## Storage

For version 7.5 of Saperion, ECM the following storage systems are supported.

Specification	Description																													
Hardware	<table><tr><th>Storage Plugin</th><th>Supported Version</th><th>Operating System</th></tr><tr><td>IBM SSAM/TSM DR450/DR550</td><td>Client: 5.4.0.2 Server: 5.2.2.0</td><td>Windows</td></tr><tr><td>IBM SSAM/TSM Information Archive</td><td>Client: 6.1 32-bit</td><td>Windows</td></tr><tr><td>EMC VNX (Centera)</td><td>CentraStar 4.3</td><td>Windows</td></tr><tr><td>NetApp SnapLock</td><td>ONTAP 8.2.7m (7-mode is supported)</td><td>Windows</td></tr><tr><td>KOM Networks KOMpliance</td><td>KOMworx 6.3.10</td><td>Windows</td></tr><tr><td>EMC Isilon</td><td>OneFS 7.1.0.0</td><td>Windows</td></tr><tr><td>Generic NAS</td><td>-</td><td>Windows</td></tr><tr><td>Hitachi Content Platform via HTTP</td><td>3.0.4</td><td>Windows</td></tr></table>			Storage Plugin	Supported Version	Operating System	IBM SSAM/TSM DR450/DR550	Client: 5.4.0.2 Server: 5.2.2.0	Windows	IBM SSAM/TSM Information Archive	Client: 6.1 32-bit	Windows	EMC VNX (Centera)	CentraStar 4.3	Windows	NetApp SnapLock	ONTAP 8.2.7m (7-mode is supported)	Windows	KOM Networks KOMpliance	KOMworx 6.3.10	Windows	EMC Isilon	OneFS 7.1.0.0	Windows	Generic NAS	-	Windows	Hitachi Content Platform via HTTP	3.0.4	Windows
	Storage Plugin	Supported Version	Operating System																											
	IBM SSAM/TSM DR450/DR550	Client: 5.4.0.2 Server: 5.2.2.0	Windows																											
	IBM SSAM/TSM Information Archive	Client: 6.1 32-bit	Windows																											
	EMC VNX (Centera)	CentraStar 4.3	Windows																											
	NetApp SnapLock	ONTAP 8.2.7m (7-mode is supported)	Windows																											
	KOM Networks KOMpliance	KOMworx 6.3.10	Windows																											
	EMC Isilon	OneFS 7.1.0.0	Windows																											
	Generic NAS	-	Windows																											
	Hitachi Content Platform via HTTP	3.0.4	Windows																											
<p>The GenericNAS Plug-in connects NAS and SAN devices. Connectivity via Fibre-Channel or iSCSI indicates a SAN device. TCP/IP indicates a NAS device.</p>																														
<p>All plugins are tested with 32-bit drivers and a 32-bit-based Saperion server, as well as with 64-bit drivers and 64-bit-based Saperion server. The plugin for the KOM Networks KOMpliance was tested only with 32-bit drivers. The Isilon plugin was only tested with 64-bit drivers.</p>																														
<p>The following storage systems can be used with the NetApp plugin (SnapLock) as well.</p>																														
<ul style="list-style-type: none"><li>• EMC VNX (Celerra, Clarion)</li><li>• FAST LTA Silent Cube Version 1.00.18. Prerequisite: SW-Option „Compliance“</li><li>• GRAU FILELOCK. Prerequisite: must be set to mode SFR</li><li>• iTernity iCAS Version 3.7 / (also HP iCAS)</li></ul>																														
<p>Generic NAS has been tested against remote Windows share.</p>																														

Comparison of storage system vs. records management functions:

Storage system	Storage system vs Records Management Functions	Fixed Retention	Prolongation	Event-based Retention	Litigation Hold	Disposition	Privileged Delete	Electronic Shredding	Duplicate Write
EMC <sup>2</sup> Centera	Governance	X	X	S	S	X	°		X
	Governance advanced retention feature	X	X	X	X	X	°	V	X
	Compliance plus advanced retention feature	X	X	X	X	X	-	V	X
NetApp SnapLock™	Compliance/Enterprise	X	X	S	S	S	O	O	O
EMC Isilon	Compliance/Enterprise	X	X	S	S	S	O	O	O
Hitachi Content Platform	via HTTP	X	X	X	X	S	-	V	-
	via Genric NAS	X	X	S	S	S	-	V	-
IBM SSAM/TSM	IBM DR550	X	X	S	S	X	°	V	-
KOM Networks KOMpliance	KOM Networks KOMpliance	X	X	S	S	S	-		-
Generic NAS	Generic NAS	S	S	S	S	S	-		-

Legend: "X" = supported by storage and Saperion  
"S" = not supported by storage but simulated by Saperion  
"O" = supported by storage but not by Saperion  
"V" = supported by storage, independent from Saperion

## Web Server & Browser

Specification	Description						
<b>Software</b>	For version 7.5 of Saperion ECM Web Client, the following browsers are certified to work with Saperion.						
	<table><tr><th>Operating System</th><th>IE</th><th>Firefox</th></tr><tr><td>Windows</td><td>10,11</td><td>31 ESR, 41.0.2</td></tr></table>	Operating System	IE	Firefox	Windows	10,11	31 ESR, 41.0.2
	Operating System	IE	Firefox				
	Windows	10,11	31 ESR, 41.0.2				
<p>Remarks: Browsers of other vendors and on other platforms may work as well. Saperion ECM Version 7.5 Web Client also includes a multi-format viewer supporting annotations as well. The supported formats can be seen in the Java/Read column of the table on this web page: <a href="http://www.snowbound.com/format/all_formats.html">http://www.snowbound.com/format/all_formats.html</a></p> <p>Customers using the additional ViewOne or ViewOne prof viewer from Deaja offered for Version 7 can use this as well.</p>							

## Oracle Java for Clients and Server

Specification	Description				
<b>Software</b>	<p>The Saperion 7.5 clients and server were tested fully with the versions listed below. Refer to the current patch level to see with which Java version the patch-level testing was done. Note that only basic functionality and code changes are covered by patch-level testing. Full compatibility cannot be guaranteed.</p>				
	Operating System	Component			
		Saperion ECM Java Core Server incl. Classic Connector	UBI API	Universal Importer	Web Client Saperion ECM Integration Server
	Windows Client	-	Java 8 Update 65*	Java 8 Update 65*	Java 8 Update 65*
	Windows Server	Java 8 Update 65*	Java 8 Update 65*	Java 8 Update 65*	Java 8 Update 65*
<p><b>*Problem with JRE Expiration Date (25)</b></p> <p>The JRE relies on periodic checks with an Oracle Server to determine if the JRE is still considered up-to-date with all the available security fixes (above the security baseline). In the past, if the JRE was unable to contact the Oracle Server, it continued to behave as though it was still the most recent version with regard to security for an indefinite period.</p> <p>Thus it can be that the Java version is expired and no longer works.</p> <p><a href="http://www.oracle.com/technetwork/java/javase/7u45-relnotes-2016950.html">http://www.oracle.com/technetwork/java/javase/7u45-relnotes-2016950.html</a></p> <p><b>Other Saperion ECM Java Core Server requirements:</b></p> <p>Web Application Servers useable as containers:</p> <ul style="list-style-type: none"> <li>Apache Tomcat, Versions 7.0.55, 8.0.12, 8.0.15, 32- and 64-bit. Higher versions should be tested before using.</li> </ul>					

## FineReader Integration

For version 7.5 of Saperion ECM, version 10 of FineReader Engine for OCR and Barcode recognition is integrated.

## Capture & Scanner Support

The Saperion Rich Client (no Web Client support) connects to scanners through TWAIN or preferably through a native ISIS interface or a Kofax Adrenaline board. ISIS is a standard for scanner drivers developed by EMC (<http://www.emc.com/products/detail/software2/pixtools.htm>) that is also a MS61 standard as specified by AIIM. High-quality scanners already have ISIS drivers included; otherwise they are available from Pixel Translations. Due to the high quality of ISIS drivers, they rarely need additional adjustment. Special features, such as endorsing or barcode recognition, may require customization. The native ISIS Interface supports automatic document feed (ADF) and duplex scanning, but does not actively support endorsing. To allow connectivity to scanners that do not have an ISIS driver, developer toolkits are provided by Pixel Translations and LEADTOOLS ([www.leadtools.com](http://www.leadtools.com)). Saperion supports Kofax Software VRS and Adrenaline Boards as well. Adrenaline is a set of scanner controllers, image processing accelerators, and software engines for professional document scanning. ([www.kofax.com](http://www.kofax.com)). Based on positive feedback, the use of scanners from Kodak, Fujitsu or Canon is recommended, in addition to all certified scanners by Kofax.

The Saperion ECM Release Script for Kofax Capture 10 has been successfully implemented and tested by various partners.

## Signature Integrations

Specification	Description															
Software	<p>The following signature solutions are integrated with the 7.5 version of Saperion ECM Rich Client.</p> <table><tr><th>Vendor</th><th>Version</th><th>Module</th></tr><tr><td>secrypt</td><td>3.4.3.5</td><td>digiSeal office</td></tr><tr><td></td><td>3.4.3.5</td><td>digiSeal office pro</td></tr><tr><td></td><td>2.2.3.12</td><td>digiSeal server for verification</td></tr><tr><td></td><td>1.0.1.6</td><td>digiSeal archive</td></tr></table> <p><b>Note</b> For more information about requirements of third-party tools such as card readers, chip cards, algorithms or key lengths, consult the manufacturer's product specifications or the Bundesnetzwerkagentur (BNetzA), as appropriate.</p>	Vendor	Version	Module	secrypt	3.4.3.5	digiSeal office		3.4.3.5	digiSeal office pro		2.2.3.12	digiSeal server for verification		1.0.1.6	digiSeal archive
Vendor	Version	Module														
secrypt	3.4.3.5	digiSeal office														
	3.4.3.5	digiSeal office pro														
	2.2.3.12	digiSeal server for verification														
	1.0.1.6	digiSeal archive														

## LDAP Support

Specification	Description								
<b>Software</b>	<p>For version 7.5 of Saperion ECM, we support the synchronization with a directory service (AD DS).</p> <table><tr><th>Vendor</th><th>Product</th><th>Version</th><th>synchronization</th></tr><tr><td>Microsoft</td><td>ADS DS<sup>1</sup></td><td>Windows Server 2008 R2 2008  Windows Server 2012</td><td>+</td></tr></table> <p><sup>1</sup>Active Directory® Domain Services (AD DS) stores information about users, computers, and other resources on a network. AD DS helps administrators manage this information securely. It also facilitates resource sharing and collaboration among users. AD DS is required for directory-enabled applications, such as Microsoft® Exchange Server, and for other Windows Server® technologies, such as Group Policy.</p> <p>The LDAP products and OS combinations listed are supported. Other combinations, versions and other LDAP-based directory services may work as well (e.g. OpenLDAP Foundation or Novell). NOTE: LDAP is a standard with a wide range of possibilities, and there are many configurations which may not work in combination with the synchronization implementation of Saperion. We therefore recommend scheduling time for a detailed analysis of the requirements for using the synchronization with Saperion. The use of OpenLDAP in projects in particular needs expertise in complex environments. This must be accounted for in your planning.</p>	Vendor	Product	Version	synchronization	Microsoft	ADS DS <sup>1</sup>	Windows Server 2008 R2 2008  Windows Server 2012	+
Vendor	Product	Version	synchronization						
Microsoft	ADS DS <sup>1</sup>	Windows Server 2008 R2 2008  Windows Server 2012	+						

## Import Facilities

Specification	Description			
Software	For version 7.5 of Saperion ECM, several import tools are available under the Import option.			
	Function	Saperion ECM Universal Importer Version 3.4	Fast Importer	Manual Load
	Part of Rich Client?	No. (Java-based application)	x	x
	Interface	UBI, Classic Connector	-	-

## COLD Support

COLD is supported for 32-bit Core Server/Java Core (server-side COLD for 7.5) and for 64-bit Core Server/Java Core (server-side COLD for 7.5 64-bit).

## Language Support

Specification	Description																																																												
Language	<div>For version 7.5 of Saperion ECM, the following languages are supported as shown.</div> <table><tr><th>Language</th><th>User Interface</th><th>Workflow Inbox</th><th>Manuals (PDF)</th><th>Online Help</th><th>Standard</th></tr><tr><td>Arabic</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>English</td><td>X</td><td>X</td><td>X</td><td>X</td><td>X</td></tr><tr><td>German</td><td>X</td><td>X</td><td>X</td><td>X</td><td>X</td></tr><tr><td>Polish</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>Russian</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>Spanish</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>Turkish</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>French</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr><tr><td>Italian</td><td>X</td><td>X</td><td>-</td><td>-</td><td>X</td></tr></table> <div><div>Legend:</div><div>-</div><div>The documentation and online help is in English for all languages other than German.</div><div><sup>1</sup></div><div>The Workflow Inbox User Interface can be configured individually.</div><div>Standard: X</div><div>This language is included with every new version.</div><div>Standard: o</div><div>This language is not standard but is currently available. ## Saperion Products

### Saperion ECM ContentLink for Microsoft SharePoint

For version 7.5 of Saperion ECM, Saperion InterServer 2.7.3.0 (20130801) for SharePoint 2010-2016 is integrated. SharePoint Online is not supported.

### Saperion ECM Web Content Archive

Specification	Description	
<b>Application Server</b>	Specification	Version
	IIS	6.7 or 7.5
	Apache	2.x (Linux/Unix) 32/64 bit
<b>DBMS</b>	Specification	Version
	Microsoft SQL Server	2005/ 2008

## Saperion Office Integration

Specification	Description								
<b>Software</b>	<p>For version 7.5 of Saperion ECM, the following Microsoft Office products are certified to work.</p> <p>Note: Saperion Office Integration will begin supporting Office 2016 with the release of Saperion 7.5 SP6 (Spring 2016).</p> <table><tr><th>Office System</th><th>Version</th><th>Component</th><th>Operating System</th></tr><tr><td>Microsoft Office (Word, Excel, Powerpoint, Outlook)</td><td>2007, 2010<sup>2</sup>, 2013<sup>3</sup>, Office 365 Pro Plus only 32-bit</td><td>Office Integration 3<sup>1</sup></td><td>All client systems as listed above.</td></tr></table> <p><sup>1</sup> The Office Integration is independent of the Saperion version used.</p> <p><sup>2</sup> Mapping only works with the legacy forms from older MS Office versions.</p> <p><sup>3</sup> Microsoft Office Professional Plus 2013, Microsoft Office Professional 2013, Microsoft Office Home and Business 2013, Microsoft Office 2013 Standard. OEM and volume licenses.</p>	Office System	Version	Component	Operating System	Microsoft Office (Word, Excel, Powerpoint, Outlook)	2007, 2010 <sup>2</sup> , 2013 <sup>3</sup> , Office 365 Pro Plus only 32-bit	Office Integration 3 <sup>1</sup>	All client systems as listed above.
Office System	Version	Component	Operating System						
Microsoft Office (Word, Excel, Powerpoint, Outlook)	2007, 2010 <sup>2</sup> , 2013 <sup>3</sup> , Office 365 Pro Plus only 32-bit	Office Integration 3 <sup>1</sup>	All client systems as listed above.						

## Saperion E-Mail Lifecycle Management (ELM)

Specification	Description									
<b>Software</b>	<p>For version 7.5.5 of Saperion ECM, the following components are certified to work. For more information, see the ELM Release Notes in the Saperion documentation portal.</p> <table><tr><th>Operating System</th><th>ELM 3 for Notes</th><th>ELM 6.3 for Exchange</th></tr><tr><td>Windows Workstation</td><td>Notes 8 and higher</td><td>Outlook 2010</td></tr><tr><td>Windows Server</td><td>Notes 8 and higher</td><td>Exchange 2007/2010/2013  For database compatibility, see the Saperion “Databases” section, above.</td></tr></table>	Operating System	ELM 3 for Notes	ELM 6.3 for Exchange	Windows Workstation	Notes 8 and higher	Outlook 2010	Windows Server	Notes 8 and higher	Exchange 2007/2010/2013  For database compatibility, see the Saperion “Databases” section, above.
Operating System	ELM 3 for Notes	ELM 6.3 for Exchange								
Windows Workstation	Notes 8 and higher	Outlook 2010								
Windows Server	Notes 8 and higher	Exchange 2007/2010/2013  For database compatibility, see the Saperion “Databases” section, above.								

## Saperion ECM Process Modeler Powered by SIGNAVIO

Specification	Description		
<b>Software</b>	For version 7.5 of Saperion ECM, Version 6.7.0.9 (Process Modeler powered by Signavio) and 7.2.0 is supported.		
<b>Browser</b>	Version	Only for viewing processes	Modeling Function
	6.7.0.9	Microsoft Internet Explorer from Version 6.0, Mozilla Firefox from Version 4.5, Apple Safari from Version 4.0, Google Chrome from Version 10.0, Signavio Thin Client from Version 1.0	Microsoft Internet Explorer from Version 9.0, Mozilla Firefox from Version 3.5, Apple Safari from Version 4.0, Google Chrome from Version 10.0, Signavio Thin Client from Version 1.0 (only for Microsoft Windows XP/Vista/7)
	7.2.0	Microsoft Internet Explorer from Version 6.0, Mozilla Firefox from Version 4.5, Apple Safari from Version 4.0, Google Chrome from Version 10.0, Signavio Thin Client from Version 1.0	Microsoft Internet Explorer from Version 9.0, Mozilla Firefox from Version 3.5, Apple Safari from Version 4.0, Google Chrome from Version 10.0, Signavio Thin Client from Version 1.0 (only for Microsoft Windows XP/Vista/7)

## Saperion ECM Suite for SAP Solutions

Specification	Description	
<b>Software</b>	For version 7.5 of Saperion ECM, the following components are certified for SAP as noted below.	
	<b>Component</b>	<b>Version</b> <b>Comments</b>
	Saperion ECM DATA Archiving for SAP	1.0 Available from Saperion V7.1 SP1 SAP Certified – BC-ILM 3.0 WEBDAV Storage Interface
	Saperion ECM R/Indexer for SAP	1.0 Available from Saperion V7.1 SP 1, needs Saperion Java Server (Classic Connector Application) available for SAP ERP 6.0
	Saperion ECM R/Link	- All operating systems supported by Saperion SAP certified – BC 7.20 Certification
	R/Indexer (Procomp)	5.0.1 Microsoft® Windows
	MDS Extractor	1.0 Independent from Saperion ECM. Microsoft SQL Server Native Client or Oracle 10 or higher is required. On request, every project must be approved by Saperion's Competence Center
	FastLink	2.1.0.0 All Microsoft Windows operating systems supported by Saperion
	Migration Tool	2.1 SAP ERP 6.0 Supported SAP objects: Incoming documents (FAX / TIF) Outgoing documents (PDF) Drag & Drop Documents as DOC / XLS / TXT / JPG / GIF / BMP / PPT / FAX / TIF Archive files out of SAP ADK (REO data) Printlists (ALF)
	Sap Web Viewer	Saperion version 7.1 SP1 or 7.5 SP3 and higher SAP ERP 6.0 and higher (earlier versions on request) Internet Explorer versions 8, 10 and 11
<sup>1</sup> Contact us regarding support of other ERP Systems based on relational databases.
