Overview

A browser delivered client, codenamed “Project Titan”, sets the foundation for all future Perceptive Content client updates. Leveraging Hyland user interface and the reusable components that are part of every Hyland product, Project Titan brings something completely new to the Perceptive Content product family.

Titan 3.0.2 Release (September 2023)

The following features are included in the initial release of Titan 3.0.2.

- Resolved an issue in Workflow where the system would incorrectly return the user to the Workflow grid, instead of the Workflow viewer, after clicking View Next Item and then pressing X or ESC on the keyboard to close the prompt. (PER-8739)
- Resolved an issue where a selected item’s status was being incorrectly set. (PER-8901)
- Resolved an issue where redundant calls were being made in some instances causing a performance degradation. (PER-8606)
- Resolved an issue where the system would ignore the showProperties parameter in a Capture URL. (PER-8611)

Titan 3.0.1 Release (August 2023)

The following features are included in the initial release of Titan 3.0.1.

- Updated the toast notification message for the document types that are not allowed in the selected drawer while creating the new document. (PER-8548)
- Resolved an intermittent issue associated with refreshing the grid view when a new document is created to replace an existing document from the grid. (PER-8627)
- Resolved an issue where filters were not displaying correctly when grouped by column and sorted by another column. (PER-8803)
- Resolved an issue with the Help link in the User menu opening to an invalid page. (PER-8837)
- Titan now considers both the language and locale when formatting dates in forms. (PER-8689)
- Resolved an issue with the pane width preference not saving when resized. (PER-8802)
- Titan now displays a loading indicator when the Views list is loading. (PER-8750)
- Resolved an issue where the system would incorrectly save a document with an invalid number custom property entered. (PER-8709)
- Resolved an issue where the system would not always mark the Number Custom Property field as invalid when an invalid number is entered. (PER-8708)
- Resolved an issue with Date columns not grouping correctly. (PER-8659)
- Resolved an issue where the system would not retain the prior user selection of the process or queue after leaving the Document grid. (PER-8594)
