Overview

A browser delivered client, codenamed “Project Titan”, sets the foundation for all future Perceptive Content client updates. Leveraging Hyland user interface and the reusable components that are part of every Hyland product, Project Titan brings something completely new to the Perceptive Content product family.

Titan 4.0.6 Release (November 2024)

The following component is included in this month's patch.

- Updated route handling for URL requests to support links generated for Content Apps. (PER-11181)

Titan 4.0.5 Release (September 2024)

The following component is included in this month's patch.

- Resolved an issue where the view would not execute when passing view constraints. (PER-10888)

Titan 4.0.4 Release (August 2024)

The following component is included in this month's patch.

- Resolved an issue where view result headers would not display in iOS 17.5.1 or higher. (PER-10763)

Titan 4.0.3 Release (June 2024)

The following component is included in this month's patch.

- Resolved an issue where the Edit Column dialog box did not allow filtering by document type when adding custom property columns to folder content views. (PER-10339)
- Resolved an issue where custom property columns in folder content views were being removed when running the view. (PER-10340)

Titan 4.0.2 Release (May 2024)

The following component is included in this month's patch.

- Resolved an issue, where an unhandled error message was displayed when the logged-on user does not have the privilege to use a particular folder type. (PER-9615)
- Updated the error message received when creating or copying a document with the same name and path as an existing folder. (PER-9641)
- Resolved an issue where the Add and Remove options on the New Document and Copy Document dialog box would not display if the selected document type had composite properties. (PER-9643)
- Resolved an issue in Capture, where invalid date formats could incorrectly pass for a folder custom property without error. (PER-9472)

- Resolved an issue where the keyboard shortcut for showing and hiding a form would not work when opening a document in the Folder Content viewer. (PER-9542)
- Resolved an issue where auto-suggest drop-down lists could detach from the associated field when scrolling. (PER-9556)
- Resolved an issue where values in a drop-down list could disappear after selecting and then deselecting values. (PER-10090)
- Resolved an issue where auto-suggest drop-down lists could incorrectly detach from the associated field. (PER-9556)

Titan 4.0.1 Release (April 2024)

The following components are included in this month's patch.

- Resolved an issue where the dark mode option was not available. (PER-9631)
- Resolved an issue where the Properties pane would incorrectly scroll to the top of the section when editing certain properties. (PER-9611)
- Resolved an issue where a console error was displayed when the Digital Signatures dialog box was opened. (PER-9614)

Titan 4.0.x Release (March 2024)

The following features are included in the initial release of Titan 4.0.x

- Updated the toast notification message for the document types that are not allowed in the selected drawer while creating the new document. (PER-8548)
- Resolved an intermittent issue associated with refreshing the grid view when a new document is created to replace an existing document from the grid. (PER-8627)
- Updated the error message that displays when a user tries to copy a selected document that is no longer available. (PER-8592)
- Resolved an issue in Workflow where the system would incorrectly return the user to the Workflow grid, instead of the Workflow viewer, after clicking View Next Item and then pressing X or ESC on the keyboard to close the prompt. (PER-8739)
- Resolved an issue where a selected item's status was being incorrectly set. (PER-8901)
- Resolved an issue where redundant calls were being made in some instances causing a performance degradation. (PER-8606)
- Resolved an issue where the system would ignore the showProperties parameter in a Capture URL. (PER-8611)
- Added a new configuration property, profileNamesToSourceMapping, to the capture section of the app.config.json file. This property allows you to configure mappings between a capture profile name and a capture source identifier. (PER-8610)
- Updated the Thumbnail viewer to include multi-selecting of thumbnails. (PER-8488)
- Removed the Scanner source during Capture when running Titan on an iPad. (Per-8680)

- Updated GET v5/applicationPlan to add an optional query parameter, onlyIncludeActive, to support returning only active application plans. (PER-8891)
- Added GET v6/applicationPlan that supports only returning active application plans with an optional query parameter, includeInactive, to support returning all application plans. (PER-8891)
- Updated authentication method used when making requests to Perceptive Content Rendering and Conversion Service. For more information, see Appendix C in the Titan Installation Guide 4.0. (PER-9011)
- Updated minimum required version of Perceptive Content Rendering and Conversion Service to 1.12.x. (PER-8627)
