Web VNA Technical Specifications

Web VNA specifications

Web VNA is a web-based program that provides administrators with tools to centrally manage medical information systems across the enterprise. A required amount of memory and disk space is provided. You must meet these requirements to support your system. These requirements specifically list the needs of and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

Hardware

The minimum hardware requirements are provided in the following table.

| Component | text |
|-------------------|--|
| Processor | Intel Core Duo |
| Display | 1024 x 768, 32-bit color |
| Network Interface | 10/100/1000 Mbps |
| Network Protocol | Standard network connection to DICOM devices |
