Perceptive Experience Content Apps Foundation EP4 (3.4.22) Release (May 2025)

Content Apps Foundation EP4 (3.4.22) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.22).

- Resolved an issue with the Capture Profile list incorrectly sorting by creation date instead of alphabetically. (PER-11515)

Perceptive Experience Content Apps Foundation EP4 (3.4.21) Release (June 2024)

Content Apps Foundation EP4 (3.4.21) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.21).

- Resolved an issue where a missing cookie could cause OIDC authentication to fail. (PER-10230)

Perceptive Experience Content Apps Foundation EP4 (3.4.20) Release (February 2024)

Content Apps Foundation EP4 (3.4.20) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.20).

- Resolved an issue where the Connect button on the home screen would incorrectly remain active during the OIDC redirect allowing the user to create multiple sessions. (PER-9360)
- Updated core OpenID Connect libraries and introduced a new configuration option, lesrdl-content-oidc-client, to the config.json file. For more information, see the Perceptive Experience Content Apps Installation Guide. (PER-8789)

Perceptive Experience Content Apps Foundation EP4 (3.4.18) Release (August 2023)

Content Apps Foundation EP4 (3.4.18) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.18).

- Resolved an issue where the Send To list was not displaying the list of available workflow queues in the correct order. (PER-8196)

Perceptive Experience Content Apps Foundation EP4 (3.4.16) Release (April 2023)

Content Apps Foundation EP4 (3.4.16) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.16).

- Resolved an issue where the horizontal scroll bar was not visible when viewing a form with multiple presentations. (PER-8064)
- Added two new configuration properties, excluded-search-fields and included-custom-property-search-fields, to the lesrdl-content-search-controls section of the config.json file. These properties allow administrators to configure which search properties are available to the user when creating search conditions. (PER-7559)

Perceptive Experience Content Apps Foundation EP4 (3.4.15) Release (March 2023)

Content Apps Foundation EP4 (3.4.15) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.15).

- Resolved an issue where scrolling would not work correctly after the user opens an item and then uses the back button to return to the grid. (PER-7415)
- Resolved an issue in Tasks where, under certain conditions, the system would not allow the user to open a selected item. (PER-7105)

Perceptive Experience Content Apps Foundation EP4 (3.4.14) Release (February 2023)

Content Apps Foundation EP4 (3.4.14) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.14).

- Resolved an issue where the system would not save recently used stamp annotations if the annotation position was dragged while clicking. (PER-7367)

Perceptive Experience Content Apps Foundation EP4 (3.4.13) Release (October 2022)

Content Apps Foundation EP4 (3.4.13) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.13).

- Added a new configuration property, show-search-controls, to the lesrdl-content-views section of the config.json file. This property specifies whether to display or hide the filter controls in the Views grid. (PER-7338)

Perceptive Experience Content Apps Foundation EP4 (3.4.12) Release (September 2022)

Content Apps Foundation EP4 (3.4.12) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.12).

- Resolved an issue with the system not consistently reload a document when loading a batch. (PER-7272)
- Resolved an issue with the system not displaying the rotation of an image in a thumbnail if that image was previously viewed. (PER-7279)

Perceptive Experience Content Apps Foundation EP4 (3.4.11) Release (July 2022)

Content Apps Foundation EP4 (3.4.11) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.11).

- Resolved an issue where the system would not display view results until the user scrolled the grid. (PER-7185)

Perceptive Experience Content Apps Foundation EP4 (3.4.10) Release (June 2022)

Content Apps Foundation EP4 (3.4.10) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.10).

- Resolved an issue with OIDC authentication flow when configuring the clientSession setting to les-rdk-fpa-mobile-context:IdpClientSession in Hyland Mobile 1.5 and later. (PER-7185)
- When adding a page to a document using a scanner source profile, the DPI default is now set to 300 if this value was not set in the profile. (PER-7139)

Perceptive Experience Content Apps Foundation EP4 (3.4.9) Release (May 2022)

Content Apps Foundation EP4 (3.4.9) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.9).

- Resolved an issue with the selected row on a grid not maintaining the selection after a user opens an item and then returns to the grid. (PER-7073)
- Removed the ability to add an annotation on right-click for stamp annotations. (PER-7055)

Perceptive Experience Content Apps Foundation EP4 (3.4.8) Release (April 2022)

Content Apps Foundation EP4 (3.4.8) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.8).

- Resolved an issue in Experience Mobile with forms not loading on an initial attempt. (PER-4701)
- Resolved an issue where the lesrdl-content-integration server OidcClientSession property did not correctly match the callback URL. (PER-7048)
- Resolved an issue where capturing a document using an application plan with a DATE custom property set to Default to the current date could cause the system to display a future date and day. (PER-6990)
- Resolved an issue where session pings were sent before authentication with the server. (PER-4703)

Perceptive Experience Content Apps Foundation EP4 (3.4.7) Release (February 2022)

Content Apps Foundation EP4 (3.4.7) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.7).

- Removed the all-user-cache-enabled property in the lesrdl-content-search-controls section of the config.json file. Updated user lists to an incremental search control. The new configuration property, user-list-limit, in the general-settings section specifies the maximum number of matches returned. (PER-669)
- Resolved an issue where the system would fail to re-authenticate the user after a session timeout. (PER-4702)

Perceptive Experience Content Apps Foundation EP4 (3.4.5) Release (January 2022)

Content Apps Foundation EP4 (3.4.5) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.5).

- Resolved an issue where the system would fail to re-authenticate the user after a session timeout. (PER-4702)
- Resolved an issue where Experience Capture would incorrectly require the user to enter a value for date custom property fields that allowed a blank value. (PER-4682)

Perceptive Experience Content Apps Foundation EP4 (3.4.4) Release (December 2021)

Content Apps Foundation EP4 (3.4.4) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.4).

- Resolved an issue where the system would automatically open a print dialog in Content Apps when converting a document to PDF in Chrome. (PC-90786)
- Resolved an issue with Perceptive Content forms not loading properly in Hyland Mobile Shell 1.5. (PC-90807)

Perceptive Experience Content Apps Foundation EP4 (3.4.3) Release (November 2021)

Content Apps Foundation EP4 (3.4.3) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.3).

- Added a new configuration property, max-file-size, to the lesrdl-framework-capturesource-file section of the config.json file. This property specifies the maximum file size, in MB, that you can upload when capturing a document. (PC-90751)
- Added a new configuration property, vsl-any-key-condition-enabled, to the lesrdl-content-search-controls section of the config.json file. This property specifies whether Perceptive Content Apps includes the Any Document Key condition in the list of results. (PC-90739)
- Added a new configuration property, all-user-cache-enabled, to the lesrdl-content-search-controls section of the config.json file. This property specifies whether the All Users group is loaded into the search controls cache. (PC-90766)

Perceptive Experience Content Apps Foundation EP4 (3.4.2) Release (September 2021)

Content Apps Foundation EP4 (3.4.2) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4(3.4.2).

- Resolved an issue where the ?noheader query parameter was lost during OIDC login. (PC-90545)
- Resolved an issue with the system allowing users to run views after their access privileges have been removed. (PC-90510)
- Resolved an issue where the system would incorrectly duplicate the Document Viewer each time a user would click or copy and paste a link with the anonymous URL request parameter. (PC-90505)
- Resolved an issue where the Document Viewer would remain in a loading state after closing the Print Preview tab. (PC-90460)
- Added a new configuration property, all-user-cache-enabled, to the lesrdl-content-search-controls section of the config.json file. This property specifies whether the All Users group is loaded into the search controls cache. (PC-90766)

Capture and Indexing

- A new setting, saveWithPrompt, was added to the lesrdl-content-capture-indexing section of the config.json configuration file. For more information, see the Capture and Indexing Installation Guide. (PC-90622)
- Resolved an issue with the system incorrectly locking a workflow item after refreshing your browser window with unsaved changes. (PC-90609)
- Resolved an issue with the Document Viewer not displaying the appropriate document after selecting a new document while the viewer is still loading. (PC-90608)
- Resolved an issue with the system incorrectly displaying toolbar options when the viewer is loading. (PC-90597)
- Resolved an issue where external lookups failed to set the value of a user focused field. (PC-90596)

Perceptive Experience Content Apps Foundation EP4 (3.4.1) Release (August 2021)

Content Apps Foundation EP4 (3.4.1) provides updates to the functionality of the Content Apps Foundation EP4 release.

System updates

The following system updates are included in this release of Content Apps Foundation EP4 (3.4.1).

- Resolved an issue where closing a browser tab or window while an item is open could cause the item to stay in a working status and prevent the user from opening it again in a new session. (PC-90579)
- You can now configure the format and column widths for dates displayed during advanced searches and change lookups. (PC-90580)
- Resolved an issue with shortcut keys not working when more than one shortcut key is not configured in the keyboardShortcutsConfig.json configuration file. (PC-90475)
- Resolved an issue that caused the OIDC client session to continuously log the user out. (PC-90525)
- Resolved an issue where the Date field on a prompted date constraint prompt dialog box does not display correctly. (PC-90501)
- Resolved an issue, in Capture and Indexing, where closing a browser tab or window while an item is open could cause the item to stay in a working status and prevent the user from opening it again in a new session. (PC-90579)

Capture and Indexing

- Resolved an issue with shortcut keys not working when more than one shortcut key is not configured in the keyboardShortcutsConfig.json configuration file. (PC-90475)
- You can now configure the format and column width of dates in advanced searches and on change lookups. (PC-90580)

Perceptive Experience Content Apps Foundation EP4 Release (June 2021)

The following enhancements and updates are included in the initial release of Content Apps Foundation EP4.

System updates

The following system updates are included in this release of Content Apps Foundation EP4.

- Content Apps now supports opening deep links into Hyland Mobile. (PC-90030)
- Added backURL parameter support for uploading image sets in Content Apps within Hyland Mobile. (PC-90182)
- Content Apps now supports Hyland Virtual Printer. (PC-90100)
- Resolved an issue where barcodes were not being saved during mobile capture. (PC-89718)
- Resolved an issue where new check annotation size depended on zoom level. (PC-89786)
- Resolved an issue with sending emails in Hyland Mobile (PC-89789)
- Resolved an issue where, the browser window was locked after the user moved certain modal dialog windows and resized the window browser. (PC-89146)
- Resolved an issue where the user was required to double click the comment field to be able to enter text when adding comments to a sticky note annotation. (PC-89568)

- Resolved an issue where the warning dialog box was not displayed when the user replaced a document with tasks associated with it. (PC-89806)
- Resolved an issue that caused the OIDC client session to continuously log the user out. (PC-90525)
