Updates 4

File Conversion Service 7.3.x (June 2024)

The following updates are included in this release of the File Conversion Service.

Updates

- Updated File Conversion Service to use Document Filters 24.2.0.5063. (PER-9636)
- Added support for configuring TLS certificate and keys via the environment. For more information see the secureHttpCert, secureHttpKey and secureHttpPfxEncoded configuration settings. (PER-10103)
- Added the ability to periodically log load averages for conversion requests to the console. For more information see the loadAverageLoggingInterval configuration setting. (PER-10103)
- Resolved an issue where embedded images in RTF documents may not be rendered in the correct position. (PER-9636)

File Conversion Service 7.0.x (March 2024)

The following updates are included in this release of the File Conversion Service.

Updates

- Updated File Conversion Service to use Document Filters 24.1.0.4978. (PER-9510)
- Added support for reverse proxies and X-Forwarded- headers. For more information, see the trustReverseProxy configuration setting. (PER-9510)
- Added access logging which rotates daily. The access log format can be customized using the accessLogFormat configuration setting. (PER-9510)
- Deprecated and disabled legacy stateful APIs by default. For a list of deprecated endpoints, see the API documentation. Legacy APIs can be enabled using the statefulApiEnable configuration setting. (PER-9510)
- Added TLS support. By default TLS 1.2 and TLS 1.3 are supported. Additional TLS versions can be configured using the secureHttpMinVersion and secureHttpMaxVersion configuration settings. Supports PEM and PKCS12 keystores for private keys and certificates. For more information, see additional TLS configuration settings and documentation. (PER-9510)
- Added performance load averages to the status endpoint that tracks the amount of work performed over the last 5, 15 and 30 seconds. Performance load averages do not include work submitted via the legacy stateful APIs. (PER-9510)
