Database and Talend jobs

Both the database and the Talend jobs for the Data Warehouse can reside on the same machine. The minimum technical specifications required for this server, as well as recommendations, appear in the following table.

Specification	Description
Hardware	Hardware requirements specified by respective DBMS vendors are required in addition to the Perceptive-specific requirements listed below.
Operating Systems	Microsoft Windows Server 2008 R2, 2012, or 2012 R2
DBMS	Microsoft SQL Server 2008, 2012, or 2014 using the latest SP. Both Standard and Enterprise database editions are supported.
Memory	Determined by database size and nature of Talend jobs which varies by implementation and use of the product - 3GB minimum.
Disk Space	Determined by database size which varies by implementation and use of the product - 3GB minimum.
