Perceptive Nolij Web

Release Notes

Version: 6.7.x

perceptivesoftware

Introduction

Note These release notes provide information about new and changed features in Perceptive Nolij Web 6.7.*x* and resolved issues in this release. See these topics for more information about a specific Nolij Web 6.7.*x* release. This document describes key changes in this release; it is not an all-inclusive list.

Note You should deploy Nolij Web in a test environment and perform adequate testing before running Nolij Web in a production environment.

Note If you are using ImageNow as your document storage repository, ensure that you are using the latest version of Perceptive Integration Server.

Perceptive Nolij Web 6.7.17

Refer to the following topics for more information.

Resolved Issues in Perceptive Nolij Web 6.7.17

The following issues have been resolved in Perceptive Nolij Web 6.7.17.

- Resolved the issue with a document being locked when folder locking was used until the user who locked the document accessed a new document (DE28370).

- Resolved the issue with images that are not standard-size 8.5 by 11 inches being distorted by Nolij Web (DE28783).

- Resolved the issue with save buttons on which web services were configured before version 6.6.*x* not working properly in versions of Nolij Web 6.6.*x* and later (DE28998).

Perceptive Nolij Web 6.7.16

Refer to the following topics for more information.

- Resolved Issues in Perceptive Nolij Web 6.7.16 on page 4.

Resolved Issues in Perceptive Nolij Web 6.7.16

The following issues have been resolved in Nolij Web 6.7.16.

- DE28366: The issue locks removed when users navigated away from locked folders or documents has been resolved.

- DE28486: The issue with users not being able to merge or extract pages from documents with too many legacy annotations, which corrupted the metadata, has been resolved.

Perceptive Nolij Web 6.7.15

Refer to the following topics for more information.

- New Features in Nolij Web 6.7.15 on page 4.

- Resolved Issues in Nolij Web 6.7.15 on page 4.

New Features in Nolij Web 6.7.15

The following features are new in Perceptive Nolij Web 6.7.15.

- US28781: Support for configurable relationship field indexes for Related Documents has been added.

- US28779: The Related Documents feature has been added for ImageNow views.

Resolved Issues in Nolij Web 6.7.15

The following issues have been resolved in Nolij Web 6.7.15.

- DE28178: The issue with the Java 1.7.0._u45 update that conflict with Nolij Web applets has been resolved. Versions of Java earlier than 1.7.0_45 may cause legacy warnings on Nolij Web 6.7.15.

- DE28068: The issue with too many legacy annotations in a file causing errors upon rendering has been resolved.

Perceptive Nolij Web 6.7.14

Refer to the following topics for more information.

- New Features in Perceptive Nolij Web 6.7.14 on page 5.

New Features in Perceptive Nolij Web 6.7.14

The following features are new in Perceptive Nolij Web 6.7.14.

- Support for the ImageNow file type .g42 has been added.

Perceptive Nolij Web 6.7.13

Refer to the following topics for more information.

- Resolved Issues in Perceptive Nolij Web 6.7.13 on page 5.

Resolved Issues in Perceptive Nolij Web 6.7.13

The following issues have been resolved in Perceptive Nolij Web 6.7.13.

- DE27069: The issue with drag-and-drop operations not working in Google Chrome has been resolved.
- DE27429: The issue an error message appearing in the Inbox Detail dialog box for a batch folder inbox containing more than one document has been resolved.
- DE27504: The issue with not being able to move folders in the Inbox Detail dialog box has been resolved.
- DE27631: HTML rendering issues in Java 7 have been resolved.
- DE27633: The issue with a locking error message appearing when an ImageNow document was selected after a Nolij Web document was selected has been resolved.
- DE27692: The issue with users being able to add and delete bookmarks on locked documents has been resolved.
- DE27694: The issue with users being able to move and route locked documents has been resolved.
- DE27756: The issue with the source folder not refreshing when a document was dragged and dropped to another workflow has been resolved.
- DE27883: The issue with page counts not being returned for PDF files in ECM Documentum environments has been resolved.
- DE27917: The issue with Java loading when users did not have scan or system browser permissions has been resolved.
- DE27969: The issue with being unable to view documents in ImageNow folders when ImageNow authentication was not used has been resolved.

Perceptive Nolij Web 6.7.12

Refer to the following topics for more information.

-
-

New Features in Perceptive Nolij Web 6.7.12

The following features are new in Perceptive Nolij Web 6.7.12.

- US21562: Nolij Web annotations are now supported for documents in ImageNow views and workflows.
- US26314: Workflow panel height is now resizable.
- US26315: Workflow inboxes and queues can now be collapsed and selected from a drop-down box.

Resolved Issues in Perceptive Nolij Web 6.7.12

The following issues have been resolved in Perceptive Nolij Web 6.7.12.

- DE27097: The issue with documents no longer being maximized in the Document Viewer when tablet devices were rotated to portrait view has been resolved.
- DE27535: The issue with pressing the Enter button not saving in forms has been resolved.

Perceptive Nolij Web 6.7.11

See the following topics for more information.

-

Resolved Issues in Perceptive Nolij Web 6.7.11

The following issues have been resolved in Nolij Web 6.7.11.

- DE27228: The issue with the ImageNow Open Folder action not working when the ImageNow user is not an administrator has been resolved.
- DE27263: The issue with documents in the Document Viewer not clearing when the Image Now Folder View window was closed has been resolved.
- DE27432: The issue with Related Document permissions not updating after it was initially set has been resolved.

Perceptive Nolij Web 6.7.10

See the following topics for more information.

New Features in Perceptive Nolij Web 6.7.10

The following features are new in Nolij Web 6.7.10.

- US21832: Support for viewing ImageNow folders has been added.
- US23972: Support for LDAP role creation for non-LDAP authentication schemes has been added.
- US24487: The filter drop-down boxes for ImageNow views now resizes horizontally instead of wrapping.
- US25055: Support for ImageNow Related Document has been added.
- US23656: A button that allows mobile devices to access the context menu has been added to the Folder Objects pane toolbar.
- US23657: A button that allows mobile devices to access the context menu has been added to the Query Results pane toolbar.
- US24393: A button that allows mobile devices to access the context menu has been added to the ImageNow view pane toolbar and ImageNow workflow pane toolbar.

Resolved Issues in Perceptive Nolij Web 6.7.10

The following issues have been resolved in Nolij Web 6.7.10.

- DE27164: The issue with redacted items being displayed for view-only document types, excluding TIFF types, has been resolved.
- DE2810: The -Dorg.jpedal.jai parameter is now set to true in Java options when Nolij Web is started so that PDFs are rendered correctly.
- DE2868: API error handling has been improved.
- DE2890: Role changes are now being logged in the user history.
- DE3024: Locked documents can no longer be deleted using the API.
- DE3112: Error messages now appear for authenticated users who are not Nolij Web users when they try to log in.
- DE5826: Exceptions are no longer logged when application activation is canceled.

- DE5827: Exceptions are no longer logged when users quickly click images and browsers stop the image tile stream.

- DE5990: Error messages now appear for misconfigured expressions for ImageNow custom properties.

- DE6123: The API Login Check utility now displays a message to the user that a redirect must be provided.

- DE6139: The default color for text stamps is now black.

- DE6174: The user guide now opens when the button is clicked for the Standalone Folder Viewer.

- DE6492: The Enter key and Cancel button now function correctly in the Font Size dialog box for annotations.

- DE7126: Font color can no longer be changed when an image stamp is right-clicked.

- DE7148: For free text and sticky note annotations, font size values now range from 1-50, which matches the values stated in the user guide.

- DE7259: Failed page count no longer causes the folder objects API to fail.

- DE16601: When there are multiple CAS sessions in the same browser, the Nolij Web login page is no longer displayed when users log out of Nolij Web.

- DE16763: The issue with OCR not being performed on extracted pages has been resolved.

- DE16787: The issue with document templates not being added to multiple folders has been resolved.

- DE16788: The issue with large files not being uploaded in low memory applet situations has been resolved.

- DE16789: The admin flag in the Enterprise Hierarchy now works properly when users are created.

- DE16831: Match image now rendering of ImageNow "in workflow" column in the document views by using Icons instead of yes/no both in the header as well as the row data.

- DE16832: Nolij Web now matches ImageNow rendering of the Version Controlled column in ImageNow views by using Icons instead of yes/no in the header and row data.

- DE26976: The From Address value is now saved when documents are emailed.

- DE27025: The issue with the KW_FLDHOLD table having nullable column properties for the modified date and modified by values, resulting in folder holds not being created, has been resolved.

- DE27066: The issue with users not being able to select any items after selecting a folder in ImageNow workflows has been resolved.

- DE27130: The issue with the Merge Documents option sometimes not appearing in the right-click menu in the Folder Objects pane has been resolved.

- DE27145: The OCR nightly process query size is now configurable.

- DE27164: Redactions now correctly appear on documents not in an inbox.

- DE27166: The default query size on OCR nightly process has been increased.

- DE27257: The Standalone Folder Viewer no longer locks document selection permanently.
- DE27275: The issue with filters not being cleared when switching queues in ImageNow workflows has been resolved.

Perceptive Nolij Web 6.7.9

See the following topics for more information.

New Features in Perceptive Nolij Web 6.7.9

The following features are new in Nolij Web 6.7.9.

- US12007: ImageNow is supported as a Nolij Web document storage repository.
- US12019: A server log viewer has been added to the Nolij Web administrator interface.
- US12053: The ability to drag and drop files from the desktop to the Folder Objects pane has been added (HTML5 drag-and-drop support).
- US14364: Liquibase database management has been implemented in Nolij Web.
- US16475: ImageNow integration server authentication support has been added to Nolij Web.
- US16540: Apache Tomcat 7 is now supported.
- US16548: Java 7 support for the Nolij Web server has been added.
- US17447: P3P support has been added for the standalone Document Viewer.
- US17790: The PDF rendering engine has been upgraded.
- US19694: ImageNow workflows are now supported in Nolij Web.
- US20758: Dragging and dropping of documents between Folder Objects panes has been added.
- US21560: After users log out of Nolij Web, the workflows that users view, the display sizes of the workflows, and the order of the workflows in the Workflow panes are displayed in the same way when they log back into Nolij Web.
- US21561: Workflow panes can be reordered by dragging and dropping workflows into the desired locations in the user interface.
- US21564: Nolij Web forms can be used for departments using ImageNow as the document storage repository.
- US21857: ImageNow views are now supported in Nolij Web.
- US22490: Users who are superadministrators and have no other Nolij Web roles can now log in as the superadministrator user.

Resolved Issues in Perceptive Nolij Web 6.7.9

The following issues have been resolved in Nolij Web 6.7.9.

- DE2814: The issue with files larger than 2 Gb being truncated to 2 Gb when they were indexed has been resolved.

- DE2816: The issue with .tif files from a fax machine with a resolution of 200x100 being resized horizontally when rendered in Nolij Web has been resolved.

- DE2820: The issue with Microsoft Outlook 2010 MSG files not being rendered in the Document Viewer has been resolved.

- DE2823: The issue with the Work Complete button not being enabled after users manually routed folders using the right-click menu in the Query Results pane has been resolved.

- DE2827: The issue with form validation information not being exported has been resolved.

- DE2834: The issue the text annotations being printed with the default font size, instead of the specified font size, has been resolved.

- DE2874: The issue with tooltips for form fields not being cleared if the new value for the field is empty has been resolved.

- DE3008: The issue with the database_1 setting in the nolijweb.properties file always being used for database timeout, regardless of the database index, has been resolved.

- DE3118: The issue with administrators being able to delete queries with that have wfcurrent records associated with them has been resolved.

- DE3140: The issue with documents remaining in the Folder Objects pane after they were merged has been resolved.

- DE3165: The issue with Nolij Web displaying a blue translucent approval overlay when users manually dragged and dropped a document to a folder in a workspace has been resolved.

- DE3166: The issue with WFDOCS_FILE_SIZE not being updated for documents when its value is null has been resolved.

- DE3167: The issue with a concatenated folder ID field of VARCHAR2 and date not working has been resolved.

- DE3329: The issue with filtering on custom property in the Folder Objects pane not working has been resolved.

- DE3330: The issue with the Usage Disclaimer Text field not being cleared in the Department Editor when administrators clicked on a department for which a usage disclaimer was not configured has been resolved.

- DE3332: The issue with an error message not appearing to users when a save action was not successful has been resolved.

- DE3343: The issue with Nolij Web not recognizing versions of Tesseract later than 3.0 has been resolved.

- DE3369: The issue with an error message appearing when autodisplayfirstdocument=true in the nolijweb.properties file and there are no documents in a folder in the Folder Objects pane has been resolved.

- DE3392: The issue with obsolete entries appearing in the KW_USERPERM table for deleted custom document types has been resolved.

- DE4891: The issue in forms with the overlay for list views obscuring the Properties dialog box has been resolved.

- DE4892: The issue with rotating pages in the Document Viewer resulting in the document becoming an uncompressed .tif file has been resolved.

- DE5204: The issue with page rotation in the Document Viewer not working for .tif files has been resolved.

- DE5810: The issue with SPOWVAL values and their associated user data being exported when queries were exported has been resolved.

- DE5811: The issue with subindex queries that contain a list of values field not in the KW_NEWIDX table being invalid has been resolved.

- DE5882: The issue with MSG files not being rendered in the Document Viewer has been resolved.

- DE5884: The issue with a black border appearing on documents when printing documents to paper using the Print button in the Document Viewer has been resolved.

- DE5886: The issue with documents not being indexed to an index under the More Index Types menu option for documents in subfolders has been resolved.

- DE5918: The issue with the custom property column not being the width of the Folder Objects pane when users filtered documents by custom property has been resolved.

- DE6012: The issue with an error message being displayed when users clicked on documents without custom attributes and selected Custom Properties from the right-click menu has been resolved.

- DE6021: The issue with document pages being deleted when documents were quickly rotated has been resolved.

- DE6044: The issue with the Modified By and Modified On fields not being updated in dialog boxes when documents were modified or rolled back has been resolved.

- DE6046: The issue with custom attributes not being saved for Nolij Web departments has been resolved.

- DE6141: The issue with uploading documents to subfolders not working has been resolved.

- DE6353: The issue with reverse lookup not working for advanced queries in the user interface has been resolved.

- DE6452: The issue with HTTP encoding being used for advanced queries instead of URL encoding has been resolved.

- DE6501: The issue with locked documents not showing redactions has been resolved.

- DE6537: The issue with Nolij Web displaying an error message when users clicked favorite folders added from another workflow when they did not have permissions to use that workflow has been resolved.
- DE6548: The issue with adding words to the dictionary not working in the OCR Stats tab of the Document Properties dialog box has been resolved.
- DE7170: The issue with users being able to recover documents when the public_enablerecovery parameter was set to false in the nolijweb.properties file if the parameter was previously set to true has been resolved.
- DE7179: The issue with multiple entries appearing for a word on which OCR was not successful in the KW_CNTXTEXC table, instead of a single entry, has been resolved.
- DE7241: The issue with the Print window not automatically opening after users clicked Print in the Document Viewer and saved annotation changes has been resolved.
- DE16576: The issue the link to emailed documents expiring before the specified expiration date has been resolved.
- DE16587: The issue with Nolij Web annotations being deleted when documents were merged has been resolved.
- DE16621: Java issues (such as Java missing or being disabled) are now managed in a more user-friendly manner.
- DE16635: The issue with colors for custom statuses for folders not being visible when they are selected in Mozilla Firefox has been resolved.
- DE26907: The issue with the Usage Disclaimer dialog box not being displayed after a superadministrator has reenabled the disclaimer to be displayed has been resolved.
- DE26931: The issue with Java error messages displaying that the code is running signed and unsigned code when Nolij Web applets were run has been resolved.
- DE26951: The issue with the Account Settings dialog box (opened from the Email Import dialog box) not being modal (users were not obligated to exit the Account Settings dialog box before being able to modify the Email Import dialog box) has been resolved.
