Perceptive Document Composition

Specification	Description
Server Hardware	<ul style="list-style-type: none"> • Min. 2 CPUs with 2 GHz • Min. 4 GB RAM • Max. 3 GB available hard disk space for the installation of: <ul style="list-style-type: none"> ○ .net Framework 3.5 SP1 ○ Perceptive Document Composition complete • Further hard disk space depending on the volume of documents
Client Hardware	<ul style="list-style-type: none"> • Pentium D or higher • Min. 512 MB RAM for the Client • Min. 2 GB RAM for the Studio • Max. 3 GB available hard disk space for the installation of: <ul style="list-style-type: none"> ○ .net Framework 3.5 SP1 ○ Perceptive Document Composition complete (Client 40 MB) ○ Microsoft Word
Supported Operating Systems	<ul style="list-style-type: none"> • Windows XP SP3 • Windows Vista SP2 • Windows 7 SP1 • Windows 8 • Windows 2003 Server SP2 • Windows 2003 Server R2 SP2 • Windows 2008 Server SP2 • Windows 2008 Server R2 SP1 • Windows 2012 Server <p>Note for 64bit Systems: On a 64bit System, Perceptive Document Composition is executed in 32bit compatibility mode(WOW64) .</p>
Supported Databases	<ul style="list-style-type: none"> • MS Sql-Server version 2005, 2008, 2008 R2 and 2012 • Oracle version 10g and 11g. <p>The installation of the 32bit Oracle client is necessary for the Document Composition server and the Studio to access an Oracle database.</p> <p>The original release of the Oracle 10g database does not support full-text search in docx files. When using this database product, the full-text search in docx files related to text blocks and documents does not produce the expected results.</p>
Supported Word Versions	<ul style="list-style-type: none"> • Word 2007 SP1 with installed VBA • Word 2010 with installed VBA

<p>Supported LDAP Products</p>	<ul style="list-style-type: none"> • Active Directory • Novell eDirectory • SUN Directory Server • Oracle Internet Directory • Open LDAP • Microsoft ADAM (Active Directory Application Mode)
<p>Virtualization</p>	<p>Our applications support deployment in virtual environments running the operating systems mentioned above as long as these operating systems themselves have been officially approved for use in a virtual environment.</p> <p>The only prerequisite for deployment is that virtual environments are correctly configured.</p>
<p>Virus Scanners</p>	<p>Virus scanner activities can have adverse effects on Perceptive Document Composition production environments.</p> <p>These adverse effects may result in reduced processing performance or even in the termination of critical transactions.</p> <p>To rule out the eventuality of disruption to operations, it is imperative that the effective range of virus scanner activity is configured to ensure as minimal an impact as possible.</p>

Perceptive Document Composition WebClient

Specification	Description
Document Composition	Release 5.1.0 or higher
Microsoft Silverlight 5 Runtime Environment	Microsoft provides all the necessary resources. Go to http://www.microsoft.com/getsilverlight to download the required installation package.
