Perceptive Enterprise Search

Perceptive Enterprise Search is a suite of enterprise applications that offer a choice of options for high performance search and mobile information access. The technical specifications in this document are specific to Perceptive Enterprise Search version 10.x. A new technical specification is provided for each release. For the most accurate information, refer to the technical specifications document that matches your version of Perceptive Enterprise Search.

A required amount of memory and disk space is provided. You must meet these requirements to support your Perceptive Enterprise Search system. These requirements specifically list the needs of Perceptive Enterprise Search and do not include any amount of memory or disk space you require for the operating system, environment, or other software that runs on the same machine.

Some technical specifications also provide recommendations. While requirements define the minimum system required to run Perceptive Enterprise Search, the recommended specifications serve as suggestions to improve the performance of your system. For maximum performance, review your specific environment, network, and platform capabilities and analyze your planned business usage of the system. Your specific system may require additional resources above these recommendations.

Technical Specifications

The minimum technical specifications required for Perceptive Enterprise Search, as well as some recommendations, appear in the following table.

Specification	Description
Hardware	As a minimum requirement, use a dual core processor running at 2 GHz. A server class system is required to run Perceptive Enterprise Search in an enterprise environment. The processing power of this server directly affects Perceptive Enterprise Search performance.
Operating Systems	For 32-bit or 64-bit machines running the following Microsoft operating systems: Windows Server 2000, 2003, 2003 R2, 2008, 2008 R2, and 2012.
Memory	4 GB is required, 4 to 8 GB is recommended. In addition, include any virtual memory requirements recommended by your operating system manufacturer.
Disk Space	20 GB
Client Browsers	Internet Explorer 8 and greater, Mozilla Firefox, Google Chrome, and any standards-compliant browser that supports JavaScript or AJAX.
Mobile Devices (Perceptive Enterprise Search Anywhere)	iPhone, Android, and Blackberry
Document Formats	For a list of supported document formats, refer to the ISYS Document Formats 10.0 Data Sheet .
